The Commanding Heights

Daniel Yergin, Joseph Stanislaw, 2002-06-15 The Commanding Heights is about the most powerful political and economic force in the world today the epic struggle between government and the marketplace that has over the last twenty years turned the world upside down and dramatically transformed our lives Now the Pulitzer Prize winning author of The Prize joins with a leading expert on the new marketplace to explain the revolution in ideas that is reshaping the modern world Written with the same sweeping narrative power that made The Prize an enormous success The Commanding Heights provides the historical perspective the global vision and the insight to help us understand the tumult of the past half century Trillions of dollars in assets and fundamental political power are changing hands as free markets wrest control from government of the commanding heights the dominant businesses and industries of the world economy Daniel Yergin and Joseph Stanislaw demonstrate that words like privatization and deregulation are inadequate to describe the enormous upheaval that is unfolding before our eyes Along with the creation of vast new wealth the map of the global economy is being redrawn Indeed the very structure of society is changing New markets and new opportunities have brought great new risks as well How has all this come about Who are the major figures behind it How does it affect our lives The collapse of the Soviet Union the awesome rise of China the awakening of India economic revival in Latin America the march toward the European Union all are a part of this political and economic revolution Fiscal realities and financial markets are relentlessly propelling deregulation achieving a new balance between government and marketplace will be the major political challenge in the coming years Looking back the authors describe how the old balance was overturned and by whom Looking forward they explore these questions Will the new balance prevail Or does the free market contain the seeds of its own destruction Will there be a backlash against any excesses of the free market And finally The Commanding Heights illuminates the five tests by which the success or failure of all these changes can be measured and defines the key issues as we enter the twenty first

century The Commanding Heights captures this revolution in ideas in riveting accounts of the history and the politics of the postwar years and compelling tales of the astute politicians brilliant thinkers and tenacious businessmen who brought these changes about Margaret Thatcher Donald Reagan Deng Xiaoping and Bill Clinton share the stage with the Minister of Thought Keith Joseph the broommaker's son Domingo Cavallo and Friedrich von Hayek the Austrian economist who was determined to win the twenty year battle of ideas It is a complex and wide ranging story and the authors tell it brilliantly with a deep understanding of human character making critically important ideas lucid and accessible Written with unique access to many of the key players The Commanding Heights like no other book brings us an understanding of the last half of the twentieth century and sheds a powerful light on what lies ahead in the twenty first century **New Meanings for**
