Advanced Virtual Collaboration:

Teaching and Learning in Virtual Space Sibylle Matern, Klaus Kreulich, 2023-09-20 Neue Formen der Kommunikation sowie kollaborative Lern- und Arbeitsmöglichkeiten mit virtueller Realität an Hochschulen sind Themen des Sammelbandes. Die Autorinnen untersuchen und diskutieren, wie die Digitalisierung und die Nutzung digitaler Medien das Lernverhalten und die Zusammenarbeit im Hochschulkontext beeinflussen. Wie interagieren Studierende und Lehrende in einer virtuellen Umgebung? Wie können Teams trotz räumlicher Trennung effektiv zusammenarbeiten? Welche Strukturen, Lernformate und didaktische Methoden brauchen Studierende und Lehrende, wenn sie nicht persönlich, sondern online, virtuell oder hybrid kommunizieren? Die Beiträge basieren auf Kollaborationsszenarien, die als Prototypen an der Hochschule für angewandte Wissenschaften München entwickelt und getestet wurden. Der Sammelband bietet Einblicke in aktuelle Forschungen und innovative Ansätze für die Nutzung virtueller Realität im Bildungs- und Arbeitsbereich. This anthology is concerned with new forms of communication as well as collaborative learning and working possibilities with virtual reality at universities. The authors examine and discuss how digitalisation and the use of digital media influence learning behaviour and collaboration in the university context. How do students and teachers interact in a virtual environment? How can teams work together effectively despite spatial separation? What structures, learning formats and didactic methods do students and teachers need when they communicate online, virtually or hybrid rather than face to face? The contributions are based on collaboration scenarios that were developed and tested as prototypes at the Munich University of Applied Sciences. HM The anthology offers insights into current research and innovative approaches for the use of virtual reality in education and work.

Advanced Virtual Assistants - A Window to the Virtual Future Ali Soofastaei, 2024-04-10 Advanced Virtual Assistants (AVAs) are computer programs that use artificial intelligence (AI) to perform various tasks for human users. These AI-powered assistants can help with multiple activities, including scheduling appointments, answering questions, managing email, and social media, and even performing complex calculations. They can be accessed through various platforms, including smartphones, smart speakers, and other digital devices. AVAs utilize natural language processing (NLP) and machine learning algorithms to understand human language and improve their responses over time. As these technologies advance, virtual assistants are becoming increasingly sophisticated and capable of handling more complex tasks. As a result, they are transforming how we interact with technology and providing users with more efficient and personalized experiences. This book is a helpful reference for scientists and industrial experts interested in AVAs' current and future capabilities.
