

The Hider

Daniel Carter Beard

The Hider:

The Hider Loren D. Estleman, 2005 To eighteen year old Jeff Curry the old hider and the buffalo he hunted was something of a myth like a ghost from the past stalking a dream The old man claimed to have tracked the last of the mighty beasts all the way from Arizona to Oregon where buffalo hadn't been seen in ten years It was the chance for adventure that Jeff had ached for But when these two men help an Indian framed for murder the buffalo hunt turns into a manhunt and Jeff is one of the prey *Optimal Search for Moving Targets* Lawrence D. Stone, Johannes O. Royset, Alan R.

Washburn, 2016-04-06 This book begins with a review of basic results in optimal search for a stationary target It then develops the theory of optimal search for a moving target providing algorithms for computing optimal plans and examples of their use Next it develops methods for computing optimal search plans involving multiple targets and multiple searchers with realistic operational constraints on search movement These results assume that the target does not react to the search In the final chapter there is a brief overview of mostly military problems where the target tries to avoid being found as well as rescue or rendezvous problems where the target and the searcher cooperate Larry Stone wrote his definitive book *Theory of Optimal Search* in 1975 dealing almost exclusively with the stationary target search problem Since then the theory has advanced to encompass search for targets that move even as the search proceeds and computers have developed sufficient capability to employ the improved theory In this book Stone joins Royset and Washburn to document and explain this expanded theory of search The problem of how to search for moving targets arises every day in military rescue law enforcement and border patrol operations *Artificial Intelligence Research and Development* K.
