The Ladder Of Memory

Hanne Bewernick

The Ladder Of Memory:

R. Murden, 1818 **The Art of Memory** Henry H. Fuller, 1898 **The Medieval Craft of Memory** Mary Carruthers, Jan M. Ziolkowski, 2016-01-22 In antiquity and the Middle Ages memory was a craft and certain actions and tools were thought to be necessary for its creation and recollection Until now however many of the most important visual and textual sources on the topic have remained untranslated or otherwise difficult to consult Mary Carruthers and Jan M Ziolkowski bring together the texts and visual images from the twelfth through the fifteenth centuries that are central to an understanding of memory and memory technique These sources are now made available for a wider audience of students of medieval and early modern history and culture and readers with an interest in memory mnemonics and the synergy of text and image The art of memory was most importantly associated in the Middle Ages with composition and those who practiced the craft used it to make new prayers sermons pictures and music The mixing of visual and verbal media was commonplace throughout medieval cultures pictures contained visual puns words were often verbal paintings and both were used equally as tools for making thoughts The ability to create pictures in one's own mind was essential to medieval cognitive technique and imagination and the intensely pictorial and affective qualities of medieval art and literature were generative creative devices in themselves

The Storyteller's Memory Palace Hanne Bewernick, 2010 Storytelling and remembering rely on similar practices they both arrange images in an ordered structure A story is initially memorised by the author in a mental structure which is transferred to the page via the author's choice of location organisation and imagery An interpretation that emphasises these features enhances the natural capacity for comprehension by mimicking the memory process This study describes and uncovers memory systems including the memory palace and the memory journey in medieval texts The ancient memory techniques are compared to cognitive psychology and used to interpret four modern novels A practical method of

interpretation is devised which provides the reader with direct access to a story by opening the door into the storyteller's memory palace

The Book of Memory Mary J. Carruthers, 1992-05-14 The Book of Memory is a magisterial and beautifully illustrated account of the workings and function of memory in medieval society Memory was the psychological faculty valued above all others in the period stretching from late antiquity through the Renaissance The prominence given to memory has profound implications for the contemporary understanding of all creative activity and the social role of literature and art Drawing on a range of fascinating examples from Dante Chaucer and Aquinas to the symbolism of illuminated manuscripts this unusually wide ranging book offers new insights into the medieval world
