

The Last Candidate

Royal Society of Arts (Great Britain)

The Last Candidate:

REJECTED: How the Media Excluded Alternative Candidates in the 2008 Primary Michael Soha, 2008-09-15 In the 2008 Presidential primary three largely unknown candidates emerged to challenge the status quo and call for major reform in Washington Dennis Kucinich and Mike Gravel on the Democratic side and Ron Paul on the Republican side This book focuses on their experience in trying to run for president against a political media institution that neither valued nor wanted their presence Using their experience as a case study the power and influence of our media in shaping what choices we face on election day is examined As a critique this text stands to indict the mainstream press for failing to provide a diverse group of candidates and in turn severely truncating our democratic process

Mathematical Modelling for Teachers Keng Cheng Ang, 2018-09-03 Mathematical Modelling for Teachers Resources Pedagogy and Practice provides everything that teachers and mathematics educators need to design and implement mathematical modelling activities in their classroom Authored by an expert in Singapore the global leader in mathematics education it is written with an international readership in mind This book focuses on practical classroom ideas in mathematical modelling suitable to be used by mathematics teachers at the secondary level As they are interacting with students all the time teachers generally have good ideas for possible mathematical modelling tasks However many have difficulty translating those ideas into concrete modelling activities suitable for a mathematics classroom In this book a framework is introduced to assist teachers in designing planning and implementing mathematical modelling activities and its use is illustrated through the many examples included Readers will have access to modelling activities suitable for students from lower secondary levels Years 7 and 8 onwards along with the underlying framework guiding notes for teachers and suggested approaches to solve the problems The activities are grouped according to the types of models constructed empirical deterministic and simulation models Finally the book gives the reader suggestions of different ways to assess mathematical modelling competencies in students
