Time Creation Continuum

Catherine Osborne, Catherine Rowett

Time Creation Continuum:

Time, Creation and the Continuum Richard Sorabji, 1983 **Oxford Studies in Ancient Philosophy: Volume VI: 1988**
Julia Annas, 1989-02-09 Oxford Studies in Ancient Philosophy is an annual publication which includes original articles some of substantial length on a wide range of topics in ancient philosophy and review articles of major books Contributors include Mary Margaret Mackenzie Aryeh Finkelberg Charles H Kahn Christopher Shields Paul Woodruff Christopher Gill Rosalind Hursthouse G E R Lloyd Henry Maconi and David Bostock Visions of the Future in Roman Frontier Kingdoms 100 BCE-100 CE Richard Teverson, 2024-09-03 This is the first book length exploration of the ways art from the edges of the Roman Empire represented the future examining visual representations of time and the role of artwork in Roman imperial systems This book focuses on four kingdoms from across the empire Cottius s Alpine kingdom in the north King Juba II s Mauretania in the south west Herodian Judea in the east and Kommagene to the north east Art from the imperial frontier is rarely considered through the lens of the aesthetics of time and Roman provincial art and the monuments of allied rulers are typically interpreted as evidence of the interaction between Roman and local identities In this interdisciplinary study which explores statues wall paintings coins monuments and inscriptions readers learn that these artworks served as something more they were created to represent the futures that allied rulers and their people foresaw The pressure of Roman imperialism drove patrons and artists on the empire s borders to imbue their creations with increasingly sophisticated ideas about the future as they wrestled with consequential decisions made under periods of intense political pressure Comprehensively illustrated and providing an important new approach to Roman material culture at the edge of empire Visions of the Future in Roman Frontier Kingdoms 100 BCE 100 CE is suitable for students and scholars working on Rome and its frontiers as well as Roman material culture more broadly and those studying the aesthetics of time in art and art history **Descartes' Temporal Dualism** Rebecca Lloyd Waller, 2014-10-15 Time plays many crucial roles in Descartes physics metaphysics and epistemology but has been an understudied area of his philosophy Rebecca Lloyd Waller argues for a new interpretation of Descartes account of time in light of the views held by his major predecessors By studying Descartes account of time through its historical context Lloyd Waller contends that Descartes views are actually consistent comprehensive and more historically significant than has been recognized Descartes offers a type of temporal dualism composed of intrinsic duration and an innate idea of time in thought Lloyd Waller s explanation of Descartes time in thought is also the key to resolve many significant problems in the contemporary literature Given both its historical sensitivity and its ability to directly engage and address common interpretive puzzles Descartes temporal Dualism offers a significant contribution to the understanding of an important but frequently neglected component of Descartes ontology Space, Time, and Presence in the Icon Clemena Antonova, 2010 This book contributes to the re-emerging field of theology through the arts by proposing a way of approaching one of the most challenging theological concepts divine timelessness through the

principle of construction of space in the icon One of the main objectives of this book is to discuss critically the implications of reverse perspective which is especially characteristic of Byzantine and Byzantine art Drawing on the work of Pavel Florensky one of the foremost Russian religious philosophers at the beginning of the 20th century Antonova shows that Florensky's concept of supplementary planes can be used productively within a new approach to the question Antonova works up new criteria for the understanding of how space and time can be handled in a way that does not reverse standard linear perspective as conventionally claimed but acts in its own way to create eternalised images which are not involved with perspective at all Arguing that the structure of the icon is determined by a conception of God who exists in past present and future simultaneously Antonova develops an iconography of images done in the Byzantine style both in the East and in the West which is truer to their own cultural context than is generally provided for by western interpretations This book draws upon philosophy theology and liturgy to see how relatively abstract notions of a deity beyond time and space enter images made by painters

Ammonius: On Aristotle On Interpretation 9 with Boethius: On Aristotle On Interpretation 9 David L. Blank, Norman Kretzmann, 2014-04-10 This book is about determinism It contains the two most important commentaries on the determinist sea battle argument and on other deterministic arguments besides It includes the earliest full exposition of the Reaper argument for determinism and a discussion of whether there can be changeless knowledge of the passage of time It also contains the two fullest expositions of the idea that it is not truth but only definite truth that would imply determinism Ammonius and Boethius both wrote commentaries on Aristotle's *On Interpretation* and on its ninth chapter where Aristotle discusses the sea battle Their comments are crucial for Ammonius commentary influenced the Islamic the Islamic Middle Ages while that of Boethius was of equal importance to medieval Latin speaking philosophers It was once argued that Boethius was influenced by Ammonius but these translations are published together in this volume to enable the reader to see clearly that this was not the case Ammonius draws on the fourth and fifth century Neoplatonists Iamblichus Syrianus and Proclus He arranges his argument around three major deterministic arguments and is our main source for one of them the Reaper argument which has hitherto received insufficient attention Boethius on the other hand draws on controversies from 300 years earlier between Stoics and Aristotelians as recorded by Alexander of Aphrodisias and Porphyry This volume is essential reading for all those with an interest in the history of determinism Ammonius commentary on the first eight chapters of Aristotle's *On Interpretation* has appeared in a previously published volume in this series translated by David Blank

Thinking on Thinking Robert M. Berchman, 2021-04-23 Aristotle and Plotinus set the horizon of inquiry thinking is thinking on thinking Discussion of mind meaning and subjectivity begins with the question How is thinking on thinking different from the kind of thinking with which we are familiar The answer is that thinking on thinking is about the presuppositions concepts and problems that generate questions in ancient and modern metaphysics epistemology aesthetics philosophy of mind and philosophy of language Topics examined include the nature of intentionality and meaning identity and

relation mind and consciousness self identity and subjectivity which lead into discussions concerning other minds the limits of thought and language and the emergence of aesthetics of the self The effects of thinking on thinking are mapped particularly in parsing problems in ancient modern analytic and phenomenological thought with advocacy of its importance in the present age

God and Creation David B. Burrell, Bernard McGinn, 1990 The manifest strength of the medieval period has always been the ways in which particular thinkers negotiated the twin criteria of reason and faith What seemed to the Enlightenment a weakness appears to our time as a virtuoso performance Less well known in the West has been the inherently interfaith and intercultural character of the discussion This collection of essays which originated in 1987 at a symposium titled God and Creation An Ecumenical Symposium in Comparative Religious Thought is devoted to the doctrine of creation in the three Western monotheistic faiths Judaism Christianity and Islam For the first time scholars from all three traditions investigate the historical and constructive aspects of this doctrine within an ecumenical environment Several important comparative dimensions especially on the relation between creation and emanation have been highlighted in new ways While some dimensions of the problematic were shared notably the Aristotelian challenge of an eternal universe others turn out to be specific to different traditions

New Catholic World ,1913 *Catholic World* ,1920 **Time Immemorial** William Adler, 1989 **On Aristotle's On Interpretation 9** Ammonius (Hermiae.), 1998 This volume is essential reading for anyone interested in the history of determinism It contains the two most important commentaries on the determinists sea battle argument as well as on other deterministic arguments The book includes the earliest full exposition of the Reaper argument for determinism a discussion of whether changeless knowledge of the passage of time is possible and the two fullest expositions of the idea that determinism is implied not by truth but only by definite truth Ammonius and Boethius both wrote commentaries on Aristotle's *On Interpretation* and on its ninth chapter where Aristotle discusses the sea battle Their comments are crucial for Ammonius commentary influenced the Islamic Middle Ages while that of Boethius was of equal importance to medieval Latin speaking philosophers

The Modern Schoolman ,2003 *On Aristotle On Interpretation 9* Ammonio, 1998 Enth *On Aristotle On interpretation 1 8* *Origins, Time and Complexity* George V. Coyne, Karl Schmitz-Moormann, Christoph Wassermann, 1994 *International Philosophical Quarterly* ,1985 **JACT Review** ,1990

Eros Unveiled Catherine Osborne, Catherine Rowett, 1994 This unique book challenges the traditional distinction between eros the love found in Greek thought and agape the love characteristic of Christianity Focusing on a number of classic texts including Plato's *Symposium* and *Lysis* Aristotle's *Ethics* and *Metaphysics* and famous passages in Gregory of Nyssa Origen Dionysius the Areopagite Plotinus Augustine and Thomas Aquinas the author shows that Plato's account of eros is not founded on self interest In this way she restores the place of erotic love as a Christian motif and unravels some longstanding confusions in philosophical discussions of love
