America's social, political, and economic landscape      **The Essential HBO Reader** Gary R. Edgerton, Jeffrey P. Jones, 2013-07-24 The founding of Home Box Office in the early 1970s was a harbinger of the innovations that transformed television as an industry and a technology in the decades that followed. HBO quickly became synonymous with subscription television and became the leading force in cable programming. Having interests in television, motion picture, and home video industries was crucial to its success. HBO diversified into original television and movie production, home video sales, and international distribution as these once separate entertainment sectors began converging into a global entertainment industry. In the mid 1980s, HBO has grown from a domestic movie channel to an international cable and satellite network with a presence in over seventy countries. It is now a full service content provider with a distinctive brand of original programming and landmark shows such as *The Sopranos* and *Sex and the City*. The network is widely recognized for its award-winning, innovative, and provocative programming, including dramatic series such as *Six Feet Under* and *The Wire*, miniseries such as *Band of Brothers* and *Angels in America*, comedies such as *Curb Your Enthusiasm* and *Def Comedy Jam*, sports shows such as *Inside the NFL* and *Real Sports with Bryant Gumbel*, documentary series such as *Taxi Cab Confessions* and *Autopsy*, and six Oscar-winning documentaries between 1999 and 2004. In *The Essential HBO Reader*, editors Gary R. Edgerton and Jeffrey P. Jones bring together an accomplished group of scholars to explain how HBO's programming transformed the world of cable television and how the network continues to shape popular culture and the television industry. Now, after more than three and a half decades, HBO has won acclaim in four distinct programming areas: drama, comedy, sports, and documentaries, emerging as TV's gold standard for its breakout series and specials. *The Essential HBO Reader* provides a comprehensive and compelling examination of HBO's development into the prototypical entertainment corporation of the twenty-first century.

Digital Terrestrial Television in Europe Allan Brown, Robert G. Picard, 2004-09-22 Digital technology for the production, transmission, and reception of television is expected to replace analogue transmission throughout the world. The timetable for this transition is uncertain, and different projections have been made for virtually every country in the world. This book gives the exhaustive details of the issues of this changeover in Europe and elsewhere. The details are placed within the context of the massive changes which the television industry has been subjected to over the past 25 years. The rollout of digital terrestrial television (DTTV) in Europe is a significant issue for every country included in this survey. It is of such importance because DTTV is the centerpiece of many governments' policies toward making Europe the world leader in new information and communication technologies. These same governments are all wrestling with the issues of how to use the technology in ways that create both commercial and non-commercial value. European perspectives on the social, cultural, and political nature of broadcasting vary significantly from those in other parts of the world and require that the introduction of DTTV should be handled differently to its introduction elsewhere. There are enormous technical, political, and economic aspects to be considered, and these vary from country to country in Europe. The two editors bring a perspective to this study as media
