Shah, 2024-10-11 Emergent Pollutants in Freshwater Plankton Communities introduces the environmental and health monitoring techniques for emergent pollutants and their influences on the community structure of lentic freshwater plankton It highlights the challenges posed by the improper treatment or disposal of industrial pharmaceutical wastes which could cause numerous related environmental and health risks It also suggests possible sustainable mitigation techniques for the treatment of emerging pollutants Further it addresses the issues of regulatory and monitoring frameworks and reviews laws governing the management and disposal of wastes This book will help students researchers and professionals address the underlying issues of waste water pollutants from various industries and ideally provide methods to achieve a sustainable and pollutant free environment for the present and future generations Presents detailed information regarding emergent pollutant effects on freshwater organisms as well as mitigation and remediation techniques Discusses foundational information regarding issues of wastes water pollutants from pharmaceuticals personal care products cosmetics and other various industries Examines several sustainable mitigation techniques for the treatment of waste pollutants Addresses the issues of regulatory and monitoring frameworks and reviews laws governing the disposal and management of waste

A Research Agenda for Environmental Law Josephine van Zeben, Chris Hilson, 2025-02-12 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com As environmental realities become ever more urgent and severe it is crucial to reflect on the potential solutions that the law can offer This timely Research Agenda introduces new directions for study and practice presenting insights into the role of environmental law in securing a sustainable society

Valorization of Solid Wastes to Biofuels and Chemical Products for Sustainable World Abha Kumari, Monika Prakash Rai, Ashokkumar Veeramuthu, Abha Mishra, 2025-10-31 This book delves into the critical intersection of waste management bioenergy production and the pursuit of a sustainable global future through the process of valorization Waste valorization is the process of reusing recycling or composting waste materials and converting them into more useful products including materials chemicals fuels or other sources of energy The urgent environmental issues surrounding the increasing accumulation of solid waste and the necessity to shift towards cleaner energy sources have led to a thorough investigation into the conversion of solid waste into biofuels and valuable chemical products This book compiles different dimensions of waste valuation for the

sustainable environment including a comprehensive description of the complex chemical composition of various types of municipal agricultural and industrial solid wastes their potential as feedstock their environmental impact and conversion technologies The book also covers challenges associated with waste management and green production technology for biofuel and chemicals from these wastes The focus extends to evaluating the feasibility of these strategies on a large scale assessing their economic viability addressing challenges encountered in their implementation and offering insights into the prospects of these innovative approaches It further elucidates the life cycle assessment of the valorization of different waste types for biofuels and chemicals and the contribution of these wastes to the circular economy The book examines cutting edge technologies and methodologies for converting solid waste materials into biofuels such as biodiesel bioethanol and biogas and valuable chemical products along with each deterring factor commercial feasibility future perspective economics its environmental impact and integral management policy This book serves as a guide for students academics researchers policymakers and industry professionals interested in the innovative and sustainable utilization of solid waste for the betterment of the environment and society

SME Policy Index: Western Balkans and Turkey 2022 Assessing the Implementation of the Small Business Act for Europe OECD,2022-07-08 Small and medium sized enterprises SMEs are essential drivers of sustainable economic growth in the Western Balkans and Turkey where they make up 99% of all firms generate 65% value added and account for 75% of employment Nevertheless SMEs across the region continue to face obstacles such as difficulties accessing financing low levels of digital uptake regulatory barriers and relatively low participation in international trade

Smart Food Packaging Systems Avik Mukherjee,Santosh Kumar,Manjusri Misra,Amar K. Mohanty,2024-09-27 Understand the future of food packaging with this timely guide Food packaging is a vital part of the food industry It contributes to food safety and quality throughout the supply chain reduced product loss allows high quality goods to be shipped safely to underserved regions and more Smart food packaging systems which can sense or detect changes in the product or packaging are at the forefront of this field and show potentially revolutionary promise Smart Food Packaging Systems offer a comprehensive overview of the fundamental principles and practical applications of Active food packaging and Intelligent food packaging systems The book incorporates the latest research developments and technologies in active and intelligent packaging systems that supplement food supply lines worldwide It is a must own for researchers and industry professionals looking to understand this key new tool in the fight against world hunger Smart Food Packaging Systems readers will also find Case studies on life cycle assessments of specific smart packaging systems Detailed discussion of topics including additives antimicrobial and other functional agents and biopolymers in active food packaging Use of sensors and indicators to monitor quality temperature and freshness of the packaged food Smart Food Packaging Systems is ideal for professionals researchers and academics in food science food technology and food packaging as well as manufacturers developers government officials and regulators working on supply chain and food distribution aspects

Circular Economy ,2018 In a circular economy waste generation is minimised and the value of products materials and resources is maintained for as long as possible It is a new economic model that offers tremendous opportunities It helps save natural resources combats climate change makes production consumption and waste management more sustainable and creates green local jobs To stimulate the transition towards this new model the European Commission released a circular economy action plan in December 2015 Two years on one of its last milestones a framework for monitoring progress has just been adopted Tracking progress is not easy as this transition is taking place in many different areas But the monitoring framework is an important tool showing how the various elements of the circular economy are beginning to mature It will help citizens and policymakers identify success factors and show where more action is needed The results will help set new priorities as Europe moves towards its long term aim a more circular economy A Circular Economy Handbook for Business and Supply Chains Catherine Weetman,2016-12-03 WINNER Les Plumes des Achats 2018 Committee Special Prize A Circular Economy Handbook for Business and Supply Chains is an easily digestible and comprehensive handbook that provides a clear guide to the circular economy helping the reader create future fit sustainable strategies Real examples across a range of market sectors help businesses students and policymakers understand the theory and fast developing practice of the circular economy To help the reader generate ideas A Circular Economy Handbook for Business and Supply Chains provides a holistic framework for the design and supply chain and supporting business models and includes tools the reader can use to get started Whilst growing global consumption presents fantastic business opportunities our current linear systems take some materials make a product use it and then throw it away are not fit for purpose The circular economy unlocks this problem by decoupling resources from consumption Engaged businesses are re thinking product design material choices business models and supply chains A Circular Economy Handbook for Business and Supply Chains is a must read for anyone who wants to apply the circular economy today Online resources now available PowerPoint slides of figures and tables from every chapter created by the author **Circular Economy Business Model for Construction Organisations** Osamudiamen Otasowie,Clinton Ohis Aigbavboa,Ayodeji Emmanuel Oke,2025-05-14 This book takes readers through the process of integrating the circular economy into the business model of construction organizations It offers not only theory but also a workable implementation plan This approach guarantees that readers can implement these insights into their construction operations with confidence It includes in depth analyses of the circular economy business model and the peculiarities of the construction sector providing an approach that considers both the opportunities and challenges faced by this sector In addition it shows how the circular economy framework can continue to be relevant and adaptable by addressing the current adoption level of the circular economy in construction and preparing readers for new developments Lastly the book demonstrates how circular value propositions can be used to implement the circular economy in the construction sector thus increasing revenue and profits in construction **Effective Waste Management and Circular**

Economy Sadhan Kumar Ghosh, Sasmita Samanta, Harish Hirani, Carlos Roberto Vieira da Silva, 2022-09-07 Effective Waste Management and Circular Economy Legislative Framework and Strategies is an invaluable resource for researchers policymakers implementers and PhD graduate and Under Graduate level students in universities and colleges analysing the legal framework strategies in waste management circular economy adoption use of mathematical and statistical modelling in setting waste management strategies sanitation and Hygiene in waste management While huge wastes are wasted by dumping there is potential of resource circulation by enforcing legislative framework to effective resource utilisation and creating business opportunities Circularity of resources in waste streams can contribute to a more secure sustainable and economically sound future through the followings Effective legal framework strategies and policy instruments Adoption of circular economy and recycling technologies Support of IoT and appropriate decision making and modelling Adoption of alternatives to plastics and other hazardous materials Economic feasibility as business case commercialisation generating employment This book addresses most of the above issues in a lucid manner by experts in the field from different countries which are helpful for the related stakeholders edited by experts in the field Sadhan Kumar Ghosh Professor at Jadavpur University internationally well known expert working in varied interdisciplinary fields including waste management having research collaboration in 40 countries Sasmita Samanta Pro Vice Chancellor KIIT Deemed to be University Bhubaneswar Odisha India having research experience in management academic administration Harish Hirani Director at CSIR CMERI Durgapur having wider fields of research in IIT Delhi with a number of research collaboration Carlos RV Silva Filho Director Presidente ABRELPE Sao Paulo SP Brazil Presidente International Solid Waste Association Netherlands has experience of working in number of international projects

Circular Economy Solutions for Sustainable Development Katarzyna Nowicka, 2025-10 Engineering the Circular Economy Biswadip Basu Mallik, Gunjan Mukherjee, Rahul Kar, Youqing Fan, 2025-09-30 Implementing the circular economy necessitates innovative approaches capable of managing the complexity and uncertainty inherent in the shift from linear to circular systems Fuzzy logic a computational approach inspired by human reasoning provides a promising framework for navigating these complexities With a practical approach this book offers how fuzzy logic can be utilized to implement the circular economy Engineering the Circular Economy Leveraging Fuzzy Logic for Implementation discusses the significance of incorporating fuzzy logic into circular economy strategies This integration enables the development of adaptive models for resource management waste reduction and supply chain optimization The book showcases various case studies and practical examples to demonstrate the application of fuzzy logic in implementing circular economy principles across diverse industries Additionally it addresses the challenges and future directions within a circular economy framework emphasizing the importance of identifying these challenges and exploring future directions for continuous improvement in sustainability efforts The potential of combining engineering fuzzy logic and the circular economy to address global sustainability challenges is highlighted showcasing how leveraging fuzzy logic facilitates informed decision

making and the creation of innovative solutions as we work toward a more sustainable future. With its forward thinking approach and focus on practical applications, this book is an essential resource for practitioners, researchers, engineers, scholars, and policymakers looking to promote innovation and sustainability in today's rapidly changing economic and environmentally conscious environment.

Sustainable Marketing and the Circular Economy in Poland Anita Proszowska, Ewa Prymon-Ryś, Anna Dubel, Anna Kondak, Aleksandra Wilk, 2024-03-22

Sustainable Marketing and the Circular Economy in Poland outlines the specific challenges around formulating an organisation's marketing strategy in line with the circular economy (CE) framework. This book helps to solve the problem of ineffective pro-environmental programmes and marketing tools which are currently used by enterprises to make their activities more sustainable. The authors identify key concepts and strategies of sustainable marketing to highlight the trends and development directions of marketing activities of modern enterprises. Focussing on Poland as a central case study, the book is illustrated with examples of organisations that are implementing sustainable marketing activities that are compatible with the CE model. It also presents the results of studies which examined the pro-environmental marketing efforts of small and medium-sized enterprises, non-governmental organisations, and other actors in Poland. To conclude, the authors put forward recommendations for CE network stakeholders regarding sustainable marketing management, focussing specifically on how to avoid accusations of greenwashing and other unethical organisational behaviour. This book will be of great interest to students and scholars of green marketing, sustainable business, and the CE, as well as entrepreneurs and business professionals looking to formulate sustainable marketing strategies.

Handbook of Materials Circular Economy Seeram Ramakrishna, Brindha Ramasubramanian, 2024-03-14

This book provides comprehensive and practical information on the design and implementation of circular systems for various industries, with a focus on Environmental, Social, and Governance (ESG) factors. The scope of the handbook is to cover the materials circularity in a deeper analysis in accordance to ESG used in various industries such as oil and gas, IT, electronics, medicine, textile, and more. The handbook also covers the key principles of the circular economy, including material efficiency, resource conservation, and waste reduction, and how they impact different industries. It further critically analyses the challenges and opportunities associated with implementing circular systems in these industries, including the framework for new business models, technical innovations, and the potential benefits in terms of environmental protection, social responsibility, and economic competitiveness. In addition to providing practical information, the handbook also addresses the ESG factors associated with the circular economy exclusively for each industry. This would include the impact of circular systems on the environment, including the reduction of greenhouse gas emissions and the protection of biodiversity, as well as the social benefits such as job creation and the economic benefits such as cost savings and increased competitiveness. The ultimate goal of the handbook should be to provide guidance and support in a niche evaluation for the development of a more sustainable and equitable future, where the circular economy is a key enabler.

Sustainable Housing in a Circular Economy

Naomi Keena, Avi Friedman, 2024-04-18 This book relates circular economy principles to housing design and construction and highlights how those principles can result in both monetary savings positive environmental impact and socio ecological change Chapters focus on three key circular economy principles and apply them to architectural construction and design namely rethinking of the end of use phase of a building and the potential of design for disassembly the role of digitization and data standardization in fostering evidence based circular economy design decision making and presenting space as a resource to conserve via exploration of the sharing economy and flexibility principles Beyond waste management and material cycles this book provides a holistic understanding of the opportunities across the building life cycle that can allow for sustainable and affordable circular housing With case studies from 13 different countries including but not limited to the Hammarby Sjöstad district in Sweden the Circle House in Denmark Benny Farm in Canada VMD Prefabricated House in Mexico and the Deep Performance Dwelling in China authors pair theoretical frameworks with real world examples This will be a useful resource for upper level students and academics of architecture construction and planning especially those studying and researching housing design building technology green project management and environmental design

Framework Proposal to Organize Sustainability Strategies Toward Transition to the Circular Economy Marcia Maria Bacovis, Daniel Nascimento-e-Silva, 2020 This study aims to propose a framework to organize sustainability strategies from the Schools of Thought of circular economics to guide the introduction of circularity in business models to meet the wishes of researchers and managers It used the bibliographic method to analyze scientific articles on circular economy level of analysis stock of knowledge on circular economy and perspective of diachronic analysis seeking to understand its evolution over time the data were organized with the aid of a synthesizer table where the characteristics of each school of thought were joined then interpreted with the content analysis technique seeking meaning for all terms cataloged in the same semantic field The strategies were organized in the stages of the technical cycle of the Systemic Diagram of the Ellen MacArthur Foundation EMF The conclusion shows that the structure created can guide the transition to an era of a more circular economy An

Introduction to Circular Economy Lerwen Liu, Seeram Ramakrishna, 2020-12-18 This book is purposefully styled as an introductory textbook on circular economy CE for the benefit of educators and students of universities It provides comprehensive knowledge exemplified by practices from policy education R restorative innovations business opportunities financing instruments regulation assessment and experiential education programs It connects a CE transformation for reaching the SDGs2030 and highlights youth leadership and entrepreneurship at all levels in driving the sustainability transformation **Green Circular Economy** Pardeep Singh, Anamika Yadav, Indranil Chowdhury, Ravindra Pratap Singh, 2023-10-12 This book highlights the concepts issues and policies related to the circular economy The chapters of this book are designed to include the theoretical approach to the green circular economy sustainable supply chain and challenges in the green circular economy The book is a step towards designing sustainable circular economy embedded production and

management practices This book also addresses the capability of green lean productions and a circular economy to improve resource efficiency and address environmental sustainability issues Environmental sustainability is a hot topic in politics science and industry There is a need to achieve economic social and environmental sustainability goals through adaptations of the green circular economy which can help minimize greenhouse gas emissions toxic pollutant releases waste and energy and resource usage by employing renewable energy concepts and recyclable materials The production processes must be resource efficient and environmentally friendly including green lean manufacturing Adopting a circular economy in manufacturing is less evident than green lean management However systematic strategies to bridge this gap have yet to be devised There is an urgent need to fully explore the Circular Economy concept to attain resource and environmental goals for the sustainability of the environment in the present era of global climate change Its framework s powerful strategies need to solve the problem created by linear economic growth through industrialization and gross economic growth There is a need to improve the sustainability management capabilities in the manufacturing and industrial sector to support the circular economy and a need to examine the impact of green human resource management This book proposes the combined approach of green lean solutions and a green circular economy Through this book we try to produce the content and information in a compiled form to give the audience an understanding of the circular economy concept framework and challenges
