Postdevelopmental Approaches to Digital Arts in Childhood Marissa McClure Sweeny, Mona Sakr, 2025-01-23 This book deconstructs traditional developmentalist logic around children s engagement with digital media where the focus is on what the digital does to children s bodies and brains Rather than seeing children as vulnerable and passive recipients the authors position

children as co creators and digital artists embracing the richness of children s digital play The chapters cover a wide range of topics including indigenous digital art digital drawing learning to code social media and artificial intelligence The authors use a diverse range of theoretical perspectives including posthumanism feminist new materialism social semiotics socialcultural and multimodal approaches to childhood to generate new ways of seeing the relationship between children and the digital The book includes chapters from academics and practitioners based in Australia Canada Sweden the UK and the USA and a companion website showcasing innovative and interactive material including visual essays and soundscapes

A New Approach to Reading Videogames as Story Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames toy games storybook games and ludonarratives This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative This book explores the idea of storyplaying in connection with new ideas on intramersive movement game mechanics and sacred play to develop a typology of videogames that will enable critics educators and theorists to situate videogames within a broad continuum of literary history Building on this foundation this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism the emerging art world of game mediated photography the various economies constructed around videogames the potential of games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author s argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today s decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises
