Yearbook Music Educators National Conference (U.S.),1916 **The Economics Of Soviet Bloc Trade And Finance** Franklyn D Holzman,2019-06-26 Reflecting Professor Holzman s important work this book deals with major issues relating to both East West and intra bloc trade Professor Holzman explores the transition in Soviet bloc economies over the past fifteen years from balanced hard currency trade to large deficits with the West and the consequent development of a huge hard currency debt He compares the causes and treatments of deficits in planned economies with those in market economies and explores the dramatic differences in foreign trade behavior exhibited by Eastern and Western nations and the difficulties that arise when these conflicting systems interact in world markets He also assesses the impact of Western economic warfare on the Soviet Union and makes recommendations for future U S trade policy The author next turns to the issue of intra bloc trade In its early years the USSR economically exploited the smaller East European nations but many argue that the Soviet Union now subsidizes trade with its partners in the Council for Mutual Economic Assistance in exchange for political military and ideological support an argument that Professor Holzman strongly challenges He also contends that CMEA when viewed as a preferential trade group or customs union has been markedly unsuccessful On another level Professor Holzman assesses the causes and possible cures for the serious chronic problems related to currency inconvertibility rigid bilateralism and inability to use exchange rates as tools of economic adjustment In an international economy growing ever more interdependent the issues raised in these previously uncollected essays will continue to gain in importance as East and West meet in trade The
