The paucity of such research extends to highly consumptive consumer behaviours regarding fast fashion i.e. impulse buying and throwaways and the related impediments these behaviours pose for sustainable fashion. Written by leading researchers in the field of sustainable fashion and supported by the Textile Institute this book evaluates fashion trends what factors have led to new trends and how the factors supporting fast fashion differ from those of the past. It explores the economic drivers of fast fashion and what social environmental and political factors should be maintained and business approaches adopted in order for fast fashion to be a sustainable model. In particular it provides consumer behaviour concepts that can be utilized at the retail level to support sustainable fashion.
