Toxic Foods Kevin R. Sweeter,2017-09-19 Unbeknownst to most people the very foods that we eat are either produced with or include ingredients that are known to be toxic poisonous and harmful Yet even with oversights such as the FDA these substances make it into the foods we depend upon for life This is a comprehensive list of such ingredients practices and means of how they are in the foods we eat and some alternatives for us to help avoid them entirely Many of these are included deliberately in our foods under the guise of being a safe and healthy alternative to certain foods and ingredients

otherwise harmful to us like sugar. However, these tend to be far worse than the ingredients they propose to replace as a healthier substitute. Please read the ingredient labels on foods you are purchasing. Refrain from anything processed. Be very wary of foods labeled diet or low calorie and even fat free. Make educated food purchases. Be a smart consumer and make yourself aware of the deception of these ingredients and how they can harm you and your children and pets. Demand better oversight and accountability of food processing and labeling of potentially harmful ingredients. Demand independent oversight and testing of foods and not allow such research to be left to the manufacturers themselves or by paid off agencies that are no more interested in your food safety than those who are responsible for using these ingredients in the first place.

Food Additives, Second Edition Revised And Expanded, *Toxicological Principles for the Safety Assessment of Direct Food Additives and Color Additives Used in Food*, 1993. Compendium of Food Additive Specifications Joint FAO/WHO Expert Committee on Food Additives. Meeting, Food and Agriculture Organization of the United Nations, 2007-01-01. These specifications provide information on the identity and purity of food additives used directly in foods or in food production. Their main objectives are to identify the food additive that has been subjected to testing for safety to ensure that the additive is of the quality required for use in food or in processing and to reflect and encourage good manufacturing practice. This publication and other documents produced by JECFA contain information that is useful to all those who work with or are interested in food additives and their safe use in food.
