The Shape Of Three:

The Shape of Three Lilith Norman,1986 This remarkable story relates the consequences of Greg Herbert s sudden confrontation with his double the havoc it wreaks on his hitherto close relationship with his brother Shane and the extraordinary situation which embroils two very different families the Herberts with their five children and their noisy crowded but happy household and the Cunninghams in their contrastingly over tidy house in a prosperous Sydney suburb whose efforts to maintain their customary calm is finally shattered by one person s haunting obsession

The Alex Studies Irene M. PEPPERBERG,Irene M Pepperberg,2009-06-30 Can a parrot understand complex concepts and mean what it says Since the early 1900s most studies on animal human communication have focused on great apes and a few cetacean species Birds were rarely used in similar studies on the grounds that they were merely talented mimics that they were after all birdbrains Experiments performed primarily on pigeons in Skinner boxes demonstrated capacities inferior to those of mammals these results were thought to reflect the capacities of all birds despite evidence suggesting that species such as jays crows and parrots might be capable of more impressive cognitive feats Twenty years ago Irene Pepperberg set out to discover whether the results of the pigeon studies necessarily meant that other birds particularly the large brained highly social parrots were incapable of mastering complex cognitive concepts and the rudiments of referential speech Her investigation and the bird at its center a male Grey parrot named Alex have since become almost as well known as their primate equivalents and no less a subject of fierce debate in the field of animal cognition This book represents the long awaited synthesis of the studies constituting one of the landmark experiments in modern comparative psychology
