The Future As History:

Ideas about the Future Burnham Putnam Beckwith, 1984 This book is the first history of scientific thought about future social events and trends covering the years 1794 to 1982 One of the best ways to prepare to make scientific predictions about the future is to review the predictions made by the most able and or stimulating earlier futurists and their reasons for making them Unfortunately these predictions are scattered among hundreds of different books and articles and no history of them has been available As a result most futurists have paid little attention to the brilliant contributions of their predecessors They rarely explain whether their own ideas are original in part or whole This book presents a pr cis of the thought of past futurists so that future futurists can understand and acknowledge the contributions of their intellectual ancestors **Future**

Lawrence R. Samuel, 2009-06-01 The future is not a fixed idea but a highly variable one that reflects the values of those who are imagining it By studying the ways that visionaries imagined the future particularly that of America in the past century much can be learned about the cultural dynamics of the time In this social history Lawrence R Samuel examines the future visions of intellectuals artists scientists businesspeople and others to tell a chronological story about the history of the future in the past century He defines six separate eras of future narratives from 1920 to the present day and argues that the milestones reached during these years especially related to air and space travel atomic and nuclear weapons the women s and civil rights movements and the advent of biological and genetic engineering sparked the possibilities of tomorrow in the public s imagination and helped make the twentieth century the first century to be significantly more about the future than the past The idea of the future grew both in volume and importance as it rode the technological wave into the new millennium and the author tracks the process by which most people to some degree have now become futurists as the need to anticipate tomorrow accelerates **The Future as History** Robert L. situation in Western Europe even though human character will not have improved However despite the fact that poverty tyranny and war will be largely eliminated the modern world may be worse for people than the traditional world because most of the things that shaped human character will be obsolete
