The Universe Byron Preiss,2010-09-02 In this book we gather together the scientists the intellectuals and the artists to learn about and speculate upon the cosmos The world right now desperately needs both the physicist and the dreamer God has blessed us with the most magnificent world imaginable We have barely made the first steps in seeing all the light in the darkness Perhaps it is the dreamer who will find out the nature of dark matter perhaps it is the scientist who will find solutions to needless hunger and mindless war For them both the bounty of the Earth and the cosmos is the currency of hope Humanity must use what it has been blessed with to survive Then as in Paul Simon s phrase we all might be dancing together with diamonds on the soles of our shoes They will be the diamonds of the stars and it will be a dance of peace

The Code Ivan Broes,2015-06-10 The Code Horizon of Infinity presents a string

of tales that authenticate the concept of the mind's ability to travel to the edge of the universe. It all began with the breath that blew a domino effect starting the collapse of a virgin universe like a cancer hollowing out a sinkhole. The residues in this ongoing recycling chemistry build the elements that gather the motor of volition, the soul of the intellect, and the moral code of character, the seed that gives meaning to matter and the nascence of a knowledge bank. Says the author, "I was fascinated by awesome childhood outer body experiences and like tangible life takes the upper hand, the experiences niggled in mind as I lived my mind in the vast expanse of space walking earth on a cushion of air. In adulthood these paranormal experiences multiplied to read meaning in them. Triggered by my baby daughter's dual nine months apart resuscitation ordeal and already minutes after birth her eyes exuded a cognitive universe. Enforced to heal her before medication brings her brain to the cabbage state, I delved deeper into the mysteries of life, the inherited old motherly spirit given a new body to deal with. I returned to my notes weighing up these coherent messages of the mind, returning with amazing scientific precision and supporting evidence from the edge of the virgin universe."

That Synching Feeling Michelle Levigne, 2021-04-27

Rover Pilot Nureen Keala Rhianni Day's best friend is on patrol on the other side of the galaxy from Mallachrom. She would rather be supporting Rhianni's mission but the bureaucrats aren't cooperating. Responding to a distress call puts Nureen in the wrong place at the wrong time. She falls through a vortex into another universe that has never heard of the Rovers or the war against the Talroqi. On a space station belonging to the Trefarian Empire, Tedrin Creed has been waiting for the vortex to open again. Five years ago Talroqi ships attacked his ship. After sending his crew away to safety, he defeated the Talroqi before the vortex sucked down his ship. He has been lying to the Empire's people ever since, waiting for the vortex to open so he can go home. When a ship and a pilot claiming to be a Rover fall through, his chance has finally come. Problem: This ship is like no Rover ship he has ever seen, and the pilot doesn't like him or believe he is who he says he is. Nureen has every reason to distrust this man who claims to be Tedrin Creed. She knows all about him. He was her grandfather's best friend and died a hero fifty years ago. Time is the problem in several ways. The vortex and the way home will only be open for a short period of time. Can they learn to trust each other and escape the dangers of the Empire before time runs out?
