**Mapping the Darkness** Kenneth Miller, 2023-10-03 WINNER OF THE 2024 ASJA BOOK AWARD BIOGRAPHY HISTORY NAMED A BEST BOOK OF THE YEAR 2023 BY THE NEW YORKER NEW YORK TIMES EDITOR S CHOICE SELECTION From award winning journalist Kenneth Miller comes the definitive story of the scientists who set out to answer two questions Why do we sleep and How can we sleep better A century ago sleep was considered a state of nothingness even a primitive habit that we could learn to overcome Then an immigrant scientist and his assistant spent a month in the depths of a Kentucky cave making nationwide headlines and thrusting sleep science to the forefront of our consciousness In the 1920s Nathaniel Kleitman founded the world s first dedicated sleep lab at the University of Chicago where he subjected research participants including himself to a dizzying array of tests and tortures But the tipping point came in 1938 when his cave experiment awakened the general public to the unknown and vital world of sleep Kleitman went on to mentor the talented but troubled Eugene Aserinsky whose discovery of REM sleep revealed the astonishing activity of the dreaming brain and William Dement a jazz bass playing revolutionary who became known as the father of sleep medicine Dement in turn mentored the brilliant maverick Mary Carskadon who uncovered an epidemic of sleep deprivation among teenagers and launched a global movement to fight it Award winning journalist Kenneth Miller weaves together science and history to tell the story of four outsider scientists who took sleep science from fringe discipline to mainstream obsession through spectacular experiments technological innovation and single minded commitment Readers will walk away with a comprehensive understanding of sleep and why it affects so much of our lives A propulsive utterly engrossing history None of it is simple and all of it is captivating The New York Times Mapping the Darkness offers two narratives at once a sweeping journey of discovery about dreams sleep and the terra incognita of unconsciousness and a wake up call about the dangers of chronic exhaustion It s time Mr Miller tells us to take our sleep back The Wall Street Journal

The Mind at Night Andrea Rock, 2009-03-25 Over the past few decades there has been a revolution in scientific knowledge about why we dream what s actually happening to the brain when we do and what the sleeping mind reveals about our waking hours Beginning with the birth of dream research in the 1950s award winning science reporter Andrea Rock traces the brief but fascinating history of this emerging scientific field She then takes us into modern sleep labs across the country bringing the scientists to life as she interprets their intellectual breakthroughs and asks the questions that intrigue us all Why do we remember only a fraction of our dreams Why are dreams usually accompanied by intense emotion such as fear or anxiety Can we really control our dreams without waking up Are universal dream interpretations valid Is dreaming our way of consolidating long term memories and filtering the day s mental detritus Can dreams truly spark creative thought or help solve problems Accessible and engaging The Mind at Night shines a bright
