The Architecture Of Desire:

The Architecture of Desire Mary Gentle, 1991 *The Architecture of Desire* Solangel Maldonado, 2024-05-21 Explores the reach of the law into our most personal and private romantic lives The Architecture of Desire examines how the law influences our most personal and private choices who we desire and choose as intimate partners and explores the psychological economic and social effects of these choices Romantic preferences as shaped by law perpetuate segregation and subordination by limiting on the basis of race individuals prospects for marriage and marriage like commitments as well as economic and social mobility The book begins by tracing the legacy of slavery anti miscegenation segregation and racially discriminatory immigration laws to show how this legal landscape facilitated the residential economic and social distance between racial and ethnic groups which in turn continue to shape romantic preferences today Solangel Maldonado argues that the law further influences intimate choices by structuring the spaces within which individuals meet and interact via practices such as redlining gentrification and zoning Maldonado includes studies of online and offline dating preferences to demonstrate that romantic predilections follow a gendered racial hierarchy in which Whites are at the top African Americans at the bottom and depending on skin tone Asian Americans and Latinos in the middle These preferences may be explicit implicit or both but they are usually the result of stereotypes reflected in social and cultural norms Furthermore since marriage confers substantial legal economic and social advantages sexual racism further limits an individual s opportunity to find a partner and reap these benefits Finally the book proposes ways to minimize the law s influence over who we desire love and bring into our families such as changes to dating platforms as well as to housing education and transportation policies *The Architecture of Desire* Colorado College. I.D.E.A. Space, 2008 **Architecture and the Unconscious** John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of

architecture and psychoanalysis the volume also analyses the city and the urban condition The Architecture of Error Francesca Hughes, 2014-11-07 Why the rise of redundant precision in architecture and the accompanying fear of error are key to understanding the discipline's needs, anxieties and desires. When architects draw even brick walls to six decimal places with software designed to cut lenses, it is clear that the logic that once organized relations between precision and material error in construction has unraveled. Precision already a promiscuous term seems now to have been uncoupled from its contract with truthfulness. Meanwhile error and the always political space of its dissent has reconfigured itself. In The Architecture of Error Francesca Hughes argues that behind the architect's acute fetishization of redundant precision lies a special fear of physical error. What if we were to consider the pivotal cultural and technological transformations of modernism to have been driven not so much by the causes its narratives declare she asks, as by an unspoken horror of loss of control over error, material life and everything that matter stands for. Hughes traces the rising intolerance of material vagaries from the removal of ornament to digitalized fabrication that produced the blind rejection of organic materials, the proliferation of material testing and the rhetorical obstacles that blighted cybernetics. Why is it she asks that the more we cornered physical error the more we feared it. Hughes's analysis of redundant precision exposes an architecture of fear whose politics must be called into question. Proposing error as a new category for architectural thought, Hughes draws on other disciplines and practices that have interrogated precision and failure, citing the work of scientists Nancy Cartwright and Evelyn Fox Keller and visual artists Gordon Matta Clark, Barbara Hepworth, Rachel Whiteread and others. These non-architect practitioners she argues show that error need not be excluded and precision can be made accountable. The Architecture of Desire M. Orlando, 1996-07-01 **Constructing a New Agenda** A. Krista Sykes, 2012-03-20 This follow up to Kate Nesbitt's best selling anthology Theorizing a New Agenda collects twenty eight essays that address architecture theory from the mid 1990s where Nesbitt left off through the present. Kristin Sykes offers an overview of the myriad approaches and attitudes adopted by architects and architectural theorists during this era. Multiple themes including the impact of digital technologies on processes of architectural design, production, materiality and representation, the implications of globalization and networks of information, the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition, if not crisis, that centers around the perceived abyss between theory and practice. Theory's transitional state persists today, rendering its immediate history particularly relevant to contemporary thought and practice. While other collections of recent theoretical writings exist, none attempt to address the situation as a whole, providing in one place key theoretical texts of the past decade and a half. This book provides a foundation for ongoing discussions surrounding contemporary architectural thought and practice with iconic essays by Greg Lynn, Deborah Berke, Sanford Kwinter, Samuel Mockbee, Stan Allen, Rem Koolhaas, William Mitchell, Anthony Vidler, Michael Hays, Reinhold Martin.

Reiser Umemoto Glenn Murcutt William McDonough Micahael Braungart Michael Speaks and many more **Expanding Fields of Architectural Discourse and Practice** Matthew Butcher, Megan O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art **Architect and Engineer** ,1919 **American Architect and Building News** ,1878 The Architect and Building News ,1928 Journal of the Society of Architects ,1928 **The Federal Architect** ,1930 *The American Architect and Building News* ,1890 American Architect and the Architectural Review ,1930 *The Imperfect City: On Architectural Judgment* Samir Younes, 2016-03-03 If architectural judgment were a city a city of ideas and forms then it is a very imperfect city When architects judge the success or failure of a building the range of ways and criteria which can be used for this evaluation causes many contentious and discordant arguments Proposing that the increase in number and intensity of such arguments threatens to destabilize the very grounds upon which judgment is supposed to rest this book examines architectural judgment in its historical cultural political and psychological dimensions and their convergence on that most expressive part of architecture namely architectural character It stresses the value of reasoned judgment in justifying architectural form a judgment based on three sets of criteria those criteria that are external to architecture those that are internal to architecture and those that pertain to the psychology of the architect as image maker External criteria include philosophies of history or theories of modernity internal criteria include architectural character and architectural composition while the psychological criteria pertain to mimetic rivalry or rivaling desires for the same architectural forms Yet although architectural conflicts can adversely influence judgment they can at the same time contribute to the advancement of architectural culture The Architecture of Desire Richard Gerard Carson, 1986 **The Architect** ,1925 **The British Architect** ,1886 New Pencil Points Eugene Clute, Russell Fenimore Whitehead, Kenneth Reid, Elizabeth L.
