Leading China's Future ,2006 Understanding Management in China Malcolm Warner,2013-11-12 China has become one of the fastest growing economies ever seen in the world in recent times In the last three decades China has transformed itself from a command economy to a market one albeit a nominally socialist one and its management systems have been reformed accordingly In the light of these changes Malcolm Warner one of the leading authorities on management in China explores the past present and future of Chinese management The first part of the work examines the history of management practices in the Middle Kingdom outlining the influence of traditional Chinese values especially the Confucian inheritance and the legacy of the imperial bureaucracy with its meritocratic examination system as well as the role of industrialization and the influx of foreign owned businesses in the late nineteenth century and the twentieth century It next goes on to consider the current state of China s management showing how a new breed of manager has evolved since the beginning of Deng Xiaoping s reforms in the late 1970s and 1980s The resulting impact of this strategy which has continued into the 1990s and the 2000s up to the present day is then examined The final part of the book concludes with reflections on how management in China is likely to develop in the near future especially on how far it will converge with global practices or to what degree an indigenous form of management with Chinese characteristics will prevail *The Future of International Fisheries Management* Lee G.
