The Shape Of Experience:

Real Materialism Galen Strawson, 2008-05-29 *Real Materialism* draws together papers written over twenty years by Galen Strawson in philosophy of mind and metaphysics Strawson focuses on five main areas of enquiry 1 the nature of the physical consciousness the mind body problem and the prospects for panpsychism 2 the self the subject of experience self consciousness and the narrative self 3 free will and moral responsibility 4 the nature of thought and intentionality and their connection with consciousness 5 the problem of causation with particular reference to the philosophy of David Hume

Wittgenstein's Investigations 1-133 Andrew Lugg, 2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company [Experiencing Time](#) Simon Prosser, 2016 Our engagement with time is a ubiquitous feature of our lives We are aware of time on many scales from the briefest flicker of change to the way our lives unfold over many years But to what extent does this encounter reveal the true nature of temporal reality To the extent that temporal reality is as it seems how do we come to be aware of it And to the extent that temporal reality is not as it seems why does it seem that way These are the central questions addressed by Simon Prosser in *Experiencing Time* These questions take on a particular importance in philosophy for two reasons Firstly there is a view concerning the metaphysics of time known as the B theory of time according to which the apparently dynamic quality of change the special status of the present and even the passage of time are all illusions Instead the world is a four dimensional space time block lacking any of the apparent dynamic features of time If the B theory is correct as the book argues then it must be explained why our experiences seem to tell us otherwise Secondly experiences of temporal features such as changes rates and durations are of independent interest because of certain puzzles that they raise the solutions to which may shed light on broader issues in the philosophy of mind **Spatial Senses** Tony Cheng, Ophelia Deroy, Charles Spence, 2019-05-29 This collection of essays brings together research on sense modalities in general and spatial perception in particular in a systematic and interdisciplinary way It updates a long standing philosophical fascination with this topic by incorporating theoretical and empirical research from cognitive science neuroscience and psychology The book is divided thematically to cover a wide range of established and emerging issues Part I covers notions of objectivity and subjectivity in spatial perception and thinking Part II focuses on the canonical distal senses such as vision and audition Part III concerns the chemical senses including olfaction and gustation Part IV discusses bodily awareness peripersonal space and touch Finally the volume concludes with Part V on multimodality *Spatial Senses* is an important contribution to the scholarly literature on the philosophy of perception that takes into account important advances in the sciences *Language, Truth and Knowledge* Thomas Bonk, 2013-03-14 This collection will prove a valuable resource for our understanding of the historic Carnap and the living philosophical issues with which he grappled It arose out of a symposium on Carnap's work Vienna 2001 With essays by Graham H Bird Jaakko Hintikka Ilkka Niiniluoto Jan Wolenski this volume will interest graduate students of the philosophy of language and logic as well as professional philosophers historians
