## **The Sirian Experiments:**

**The Sirian Experiments** Doris Lessing,1981 The first person account of Ambien II a female ruler of the Sirian empire who slowly realizes how sophisticated the Canopus empire is and attempts to effect a similar society **The Sirian Experiments** D. Lessing,1994 **The Sirian Experiments (Canopus in Argos: Archives Series, Book 3)** Doris Lessing,2012-05-31 From Doris Lessing winner of the Nobel Prize for Literature this is the third instalment in the visionary novel cycle Canopus in Argos Archives *The Sirian Experiments* Doris Lessing,1982 **The Sirian Experiments** Doris Lessing,1980 **The Sirian Experiments; the Report by Ambien 11, of the Five** Doris Lessing,1981 "Releasing Unpalatable Facts" Kathleen Patterson,1989 *Canopus in Argos - Archives* Doris Lessing,1981 **Genetics and the Literary Imagination** Clare Hanson,2020-05-06 Oxford Textual Perspectives is a series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works This is the first book to explore the dramatic impact of genetics on literary fiction over the past four decades After James Watson and Francis Crick s discovery of the structure of DNA in 1953 and the subsequent cracking of the genetic code a gene centric discourse developed which had a major impact not only on biological science but on wider culture As figures like E O Wilson and Richard Dawkins popularised the neo Darwinian view that behaviour was driven by genetic self interest novelists were both compelled and unnerved by such a vision of the origins and ends of life This book maps the ways in which Doris Lessing A S Byatt Ian McEwan and Kazuo Ishiguro wrestled with the reductionist neo Darwinian account of human nature and with the challenge it posed to humanist beliefs about identity agency and morality It argues that these novelists were alienated to varying degrees by neo Darwinian arguments but that the recent shift to postgenomic science has enabled a greater rapprochement between biological and post humanist concepts of human nature The postgenomic view of organisms as agentic and interactive is echoed in the life writing of Margaret Drabble and Jackie Kay which also explores the ethical implications of this holistic biological perspective As advances in postgenomics especially epigenetics provoke increasing public interest and concern this book offers a timely analysis of debates that have fundamentally altered our understanding of what it means to be human **Psychic Connection and the Twentieth-Century British Novel** Mark Taylor,2023-01-08 Criticism of the novel routinely starts with the assumption that characters must think develop and strive for self fulfilment as individuals This book challenges the paradigm that individualism is innate to the novel as a medium It describes how major writers throughout the twentieth century many convinced by the supposed findings of parapsychology

rejected the idea of the discrete character Treating the self as porous they offered novels structured around the development of communities and ideas rather than individuals By focusing on D H Lawrence Olaf Stapledon Aldous Huxley and Doris Lessing Mark Taylor demonstrates the need to broaden our approach to character when addressing the novel of the twentieth century and beyond

**Women in the House of Fiction** Lorna Sage,1992-08-21 The novel was once upon a time the genre women felt at home in This wide ranging and detailed study of contemporary novelists explores the forms of nostalgia shared by many feminist critics for a woman s novel and the subtle or savage strategies which have turned the house of fiction upside down The result is a critique of the nature of narrative now and a celebration of the energies that are undoing our definitions of women s work

The History of British Women's Writing, 1970-Present Mary Eagleton,Emma Parker,2016-04-29 This book maps the most active and vibrant period in the history of British women s writing Examining changes and continuities in fiction poetry drama and journalism as well as women s engagement with a range of literary and popular genres the essays in this volume highlight the range and diversity of women s writing since 1970

*The Span of Mainstream and Science Fiction* Peter Brigg,2002-11-05 From the 1960s when the advent of what many call the postmodern style made establishing genres more difficult to the present day writers have been incorporating science not only the commonly thought of science and technology but also the soft sciences such as psychology and sociology into what was previously considered mainstream fiction This book examines works by Thomas Pynchon Doris Lessing and others who incorporate science in fiction and exemplify the movement of mainstream fiction writers toward a new genre termed span It also examines works by some science fiction writers who are edging closer to the border of science fiction and slowly over into span This book maps the boundaries of the new span genre of fiction and thus helps define texts that fall outside the realms of mainstream and science fiction Diagrams are included and a bibliography and index

*Sirian Experiments: The Report by Ambien II, of the Five; Canopus in Argos: Archives* Doris Lessing,1981

The Unexpected Universe of Doris Lessing Katherine Fishburn,1985-12-06 In this first study of Doris Lessing s science fiction Fishburn devotes a chapter to each of Lessing s seven novels Her major argument is that Lessing uses these novels to change our perception of reality by describing worlds that are simultaneously similar to and different from our own Of particular importance is the fact that each narrator by functioning as an intermediary or guide leader helps skeptical readers to experience the alien worlds of Lessing s imagination As she traces the development of these seven narrators Fishburn shows how they eventually fulfill the role of the idealized author Lessing described in *The Small Personal Voice* In examining how these texts challenge us to change Fishburn discusses the influence of Marxist and Sufi thought on Lessing and also points out the striking similarity between Lessing s philosophy of wholeness and the discoveries of modern physics
