The Effect of Workplace Design to Employee Engagement, Collaborative Capability, and Perceived Work Performance in Coworking Spaces Hannah Angelica Go,Lalaine B. Boco,Joseph Christian A.,2018-03-13 Bachelor Thesis from the year 2018 in the subject Leadership and Human Resources Miscellaneous University of Santo Tomas College of Commerce and Business Administration course Human Resource Development Management language English abstract The Coworking space phenomenon is rapidly growing across the countries of North America Europe and Asia Owing to its functional work environment it offers coworkers a

collaborative atmosphere that makes them more involved at work The research study aims to describe the causal relationship of workplace design to perceived work performance and to employee engagement and collaborative capability as mediating variables through the use of Structural Equation Modeling SEM A total of 350 coworkers aged 18 60 years old from 27 different coworking spaces in Metro Manila Philippines participated in the study The findings of this research revealed that workplace design has no direct effect on perceived work performance hence perceived work performance improves when coworkers are more engaged and have better collaborative capability Nonetheless the rest of the hypothesized premises were affirmed in the result of this study This paper can help the HR managers and the business centers to create a more flexible and constructive workplace setting for their employees Further the results can be used as a basis for the fundamental shift of the traditional workspace into a new creative workplace *Coworking Atmospheres* Alexandra

Bernhardt,2023-07-07 The study by Alexandra Bernhardt deals with coworking spaces and their atmospheres In addition to a comprehensive consideration of the role of atmospheres the special significance of community in the context of these work spaces is examined in more detail Two case studies in urban coworking spaces form the core of the investigation following a qualitative research design oriented towards ethnography and a plurality of methods In the context of the analysis on the one hand what constitutes coworking in everyday life and thus the new communality at work is considered relevant practices and rituals spatial arrangements and atmospheres are elaborated in their composition On the other hand coworkers their spatial actions and the attitudes associated with them come into closer focus It is shown how users access coworking spaces as work and community spaces and what role atmospheres play In addition social entities are highlighted that are taken up by coworkers in relation to their coworking space and that help shape everyday coworking space life Tensions that arise from the coexistence of community and service logic are also uncovered and how they are dealt with is examined in more detail
