New Directions in Childhood Studies James M. Curtis, 2024-01-04 *New Directions in Childhood Studies* Innocence Trauma and Agency in the Twenty first Century acknowledges that the conceptual frameworks for understanding the experience of childhood in the twentieth century are no

longer adequate and offers important updates to the construct of American childhood. The chapters in this collection examine contemporary children's literature, film, and video games to explore the ways in which everyday realities like trauma, disaster, and death impact the experience of childhood in America today. In many ways, the essays show the narratives blur traditional lines between children's and adult content, taking children's series as subjects while also guiding them through the processes of dealing with the particular challenges. Collectively, the essays develop a more contemporary construct of the American child and offer new insights into what that construction might mean for contemporary American society and culture.

Daqinix's Group Recount: Complete Edition Daqinix, 2025-09-30. Across more than a decade, Daqinix built, experimented, failed forward, and created worlds that shaped entire communities on Roblox. This definitive volume collects the complete journey from the earliest startups and clunky Paint logos through the breakout successes that defined eras to the quieter groups that taught lessons along the way. Inside, you'll find the trials and triumphs that made a creator the ambitious Airlines, the iconic hotels, the unexpected detours, and the brands that became legends like FreshLane and McDonalds. Together, they form not just a history of groups but a story of growth, resilience, and imagination. This is more than a record of groups; it's the archive of a legacy.

Engagement Design Nelson Zagalo, 2020-03-17. Interactive media designers have been discussing modes to optimize interaction design beyond mere usability. With the arrival of Emotional Design, followed by the success of the User Experience (UX) approaches, the discussion continued, and Augmented Experience has become a complex buzzword which is more about the subject's experience than the product, and this is why it's difficult or even impossible to define it in a concise manner. We propose to move the discussion from Experience towards Engagement to emphasize the design of the relationship between artefacts, contexts, and users. Engagement asks for a more concrete type of experience with specific needs, motives, skills, and competences which can be more clearly worked into the design of artefacts. Engagement also differs from other concepts, e.g. fun, enjoyment, happiness, or well-being, and is open enough to grant freedom to designers in creating their personal world views. To push this new approach, we offer in this book a full model for the design of engagement in interactive media, still believing it can be applied beyond that. The model is arranged around what we call the three engagement streams: Progression, Expression, and Relation.
