The Hi

Frank Dumont

The Hi:

Barnes V. United States of America, 1977 *The High License Court* Frank Dumont, 1902 *Conservation on the High Seas* Simone Borg, 2012-01-01

This book from Simone Borg is a much needed and highly recommended study on conservation on the high seas and harmonizing international regimes for the sustainable use of living resources. This publication is very topical considering the continuous over exploitation of the living resources. It is a very exhaustive study of many international instruments the most importantly the 1982 The United Nations Law of the Sea Convention. The author in an admirable manner linked the issue of the conservation of living resources on the high seas to the fundamental principles underlying modern environmental law such as the precautionary principle. The unique feature which sets this book apart from the other similar publications is that it is firmly entrenched in general international law i.e. deals in a very erudite manner with the issues of fragmentation and harmonisation of international law in the context of conservation. This book will appeal not only to the experts on the law of the sea but also to general international lawyers. _ Malgosia Fitzmaurice Queen Mary University of London UK. This is an excellent book which has taken apart a very complicated part of international law and reassembled it in a manner which is up to date, accessible, insightful and coherent. In doing so, this work plugs a gap in the scholarship in this area for which the author is to be truly commended. It is an essential addition for all practitioners, scholars and students who work or study in one of the foremost environmental challenges of the 21st century: conservation on the high seas. _ Alexander Gillepsie University of Waikato New Zealand. The conservation of living marine resources with diverse characteristics and life styles has become an international concern. Borg's book provides an examination of the regulatory and legal implications of marine conservation. The analysis takes account of UNCLOS Treaties and the UNCED 1992 that aid a more holistic response by States towards conservation of the marine environment and socio-economic needs. Despite shortcomings and failures, there have been success stories that highlight the potential of effective interaction between fisheries law and environmental law. The book addresses the legal aspects of international regimes aimed at setting conservation obligations, compliance and enforcement. This is a path-breaking work that shows how international law can diversify itself into different legal streams to ensure flexibility and a degree of adaptation to the different interests of the States involved. _ John McEldowney University of Warwick UK. This timely book discusses various international norms that qualify the right which all states have to access and exploit living resources in marine areas beyond national jurisdiction in order to promote the conservation of such species. An intricate body of norms has accumulated over the last few decades, consisting of prior and subsequent rules addressing the same issues as well as a number of specialized rules that supplement more general ones. However, this process has also exposed the fragmentation of the relevant international regimes with evolving and diverse interpretations of the same legal terms, fine-tuning or qualifying earlier treaties. Uncertainty prevails as to how these norms interrelate with each other. The book assesses to what extent the harmonization of these international regimes is possible. It highlights current trends and

developments which aim at better coherence and discusses legal techniques that could serve to harmonize both the objectives of these international norms and their scope of applicability The author also demonstrates that in some cases gaps and conflicts in the existing legal framework cannot be simply interpreted away but require the further development of international law in order to be resolved properly This unique book will appeal to academics and students in international law especially those researching marine conservation and the applicable legal framework It will be equally useful to organizations both public and private with an interest in marine conservation beyond national jurisdiction Environmental groups and policy makers in maritime affairs environmental issues and fisheries management will also find much to interest them in this insightful book **Hawley's of the high street; an eccentric comedy in three acts** Walter W Ellis,1923

The Archaeology of Michigan James Edward Fitting,1975 *The Danish People's High-school* Foreningen for højskoler og landbrugsskoler (Denmark),1918 *The Book of the High Romance* Michael Williams,1924 **Weekly Notes of Cases Decided by the High Court, N.-w.
