Discerning Life with Dreams: The Triadic Relationships Between Dreams, Discernment, and Spiritual Intelligence B. Anne Frey,2008-01-23 This study explored the relationship between dreams discernment and spiritual intelligence It focused on the experience of people who use dreams to help them with spiritual discernment or decision making in a spiritual context A case study methodology included questionnaires personal dream records and interviews to understand the seven participants experiences of exploring their dreams for guidance Participants were self selected by answering an ad seeking people whose dreams had helped them to make a decision who journaled their

dreams and who consider themselves to be spiritual Most participants reported being drawn to dreamwork by a significant life experience While participants shared different perceptions as to what discernment consists of each participant reported that dreams helped them to grow spiritually A number of outcomes were exemplified falling into two main groupings a the use of discernment in order to understand a dream whether or not they ended up reaching a resolution or making a decision about the dream and b the use of dreams as part of a discernment process whether or not the dreams helped them to resolve their discernment issue or make a decision The intensity of emotion attached to an issue seemed for some to render it more difficult to arrive at particular decisions For others dreams seemed to ease the burden of discernment or decision making by raising their degree of confidence towards their resolution or decision Deepening appreciation of and growing desire for living spiritually and learning more about spirituality were indicators of a developing spiritual intelligence For most spiritual growth occurred through knowledge or learning gained from their dreams For some their belief about God's role in their life impacted their experience of the Divine in their dreams Finally the study showed that individuals are not always aware of what had helped them suggesting a subconscious process at work in both discernment and decision making The study affirmed a triadic link between dreams discernment and spiritual intelligence among people involved in spiritual dreamwork It demonstrated ways by which the discernment process can build confidence in people who are turning to their dreams for guidance in a spiritual context

Real Cities Steve Pile,2005-05-01 What is real about city life Real Cities shows why it is necessary to take seriously the more imaginary fantastic and emotional aspects of city life Drawing inspiration from the work of Walter Benjamin Sigmund Freud and Georg Simmel Pile explores the dream like and ghost like experiences of the city Such experiences are he argues best described as phantasmagorias The phantasmagorias of city life though commonplace are far from self evident and little understood This book is a path breaking exploration of urban phantasmagorias grounded empirically in a series of unusual and exciting case studies In this study four substantial phantasmagorias are identified dreams magic vampires and ghosts The investigation of each phantasmagoria is developed using a wide variety of clear

examples Thus voodoo in New York and New Orleans shows how ideas about magic are forged within cities Meanwhile
 vampires reveal how specific fears about sex and death are expressed within and circulate between cities such as London and
 Singapore Taken together such examples build a unique picture of the diverse roles of the imaginary fantastic and the
 emotional in modern city life What is real about the city has radical consequences for how we think about improving city life
 for all too often these are over looked in utopian schemes for the city Real Cities forcefully argues that an appreciation of
 urban phantasmagorias must be central to what is considered real about city life *The Dream in Homer and Greek
