**The Making of Modern Uganda** Kenneth Ingham, 1958

**The Making of Modern Uganda** Kenneth Ingham, 2023-10-13 First published in 1958 The Making of Modern Uganda is concerned with the formation of modern Uganda in the sixty years since the 1890s when the foundations of the British administration were laid In the first decade of the 20th century Sir Hesketh Bell Uganda's Governor decided that Uganda should be built up by Africans under the disinterested guidance of Europeans The book therefore traces the emergence of a territory whose material prosperity is mainly based upon peasant agriculture guided by the advice of British agricultural officers It describes the development from an era of tribal clan and even village organisation to the system of centralised government along semi parliamentary lines but notes the disagreement as to whether Uganda's future should lie as a unitary or a federal state The controversial issue of closer union with the other East African territories is studied at some length as also is the growth of the politically active minority which plays so important a part in the modern Protectorate The author believes that the years of happy Uganda the years before the Second World War were a period in which hard work coupled with peace and obvious progress tended to conceal for many the growth of new forces which needed an outlet and only found one in the political and constitutional developments of the post war age This book will be of interest to students of history African studies ethnic studies and political science

**A History of Modern Uganda** Richard James Reid, 2017 This book is the first major study in several decades to consider Uganda as a nation from its precolonial roots to the present day Here Richard J Reid examines the political economic and social history of Uganda providing a unique and wide ranging examination of its turbulent and dynamic past for all those studying Uganda's place in African history and African politics Reid identifies and examines key points of rupture and transition in Uganda's history emphasizing dramatic political and social change in the precolonial era especially during the nineteenth century and he also examines the continuing repercussions of these developments in the colonial and postcolonial periods By considering the ways in which historical culture and consciousness has been ever present in political discourse art and literature and social relationships Reid defines the true extent of Uganda's viable national history

*Uganda: A Modern History* Jan Jørgensen, 2023-10-09 Uganda A Modern History 1981 provides a comprehensive political social and economic history of Uganda from the beginnings of colonial rule in 1888 It focuses particularly on the development of the Ugandan economy and demonstrates how the economy became structurally dependent on world capitalism during the colonial period and how this has affected its subsequent development The book also deals with the political and social tendencies which shaped Ugandan society in both the colonial and postcolonial period The first four chapters examine the initial colonial occupation and the colonial state's role in the rural nexus of chiefs peasants and migrant workers They also look at the colonial state and the

context of the wider national regional and international economy and analyse the African nationalist response and the formation of political parties to take control of the postcolonial state The second part of the book considers the political alliances and economic strategies of the Obote regime and the events of Amin s military regime The epilogue looks at events since the fall of the Amin regime and suggests ways in which Uganda may be able to tackle its underlying economic problems
