With a Delicate Air Pearl Sydenstricker Buck,1966 Dering Letters Volume 2 Patricia and Edward Shillingburg,2015-01-06 The Dering Family settled on Shelter Island in 1761 and endured crop failures revolution and the difficulties of a new nation Throughout it all they raised their children emphasizing good manner civility and mostly education These letters deal with business and family matters **The Wood-lark: Containing a Numerous ... University Musical Society,1931 **The Eugenic Marriage, Vol 2** W. Grant Hague,2016-01-07 A Word to Parents Within recent times the subject of sex hygiene has been freely discussed by members of the medical profession and through them the general public has been made more or less acquainted with the problem It has therefore acquired a degree of genuine interest which speaks well for the future of the eugenic ideal Eugenics is based to a very large extent upon the principles underlying sex hygiene As a result of this widespread interest and investigation we have discovered that the only method that promises actual progress is to talk plainly and to tell the actual truth The day of the prude has passed To attempt to achieve results in the education of youth in sex problems without giving facts is wasted effort To give facts we must explain each problem so that its principles may be clearly understood and its meaning grasped To point out the duty of youth is not sufficient They must be shown why it is to their best interest to live the clean life In every department of education we are beginning to appreciate that to achieve results it must be based upon the individual equation This is why we have found it necessary to assert that it is the duty of parents to make sex hygiene a personal matter and to acquaint their children with the facts relating to this problem It has been discovered however that a very large percentage of parents are inadequately informed on these subjects in fact they know practically nothing about the actual facts which they are supposed to teach I shall try to tell the story in a way which every parent will understand When a boy reaches the age of puberty he is susceptible to sexual desire If he has not been told the story of his growth from boyhood to man s estate he will either begin to abuse himself or he will be later enticed to commit himself to intercourse with some unclean female and he will acquire a disease as a result Inasmuch as it has been asserted that practically every boy has been addicted to self abuse at some time and that eighty per cent of all males between the ages of sixteen and thirty years are victims of venereal disease it would seem justifiable to assume that the boys who are informed of the facts in time are the boys who constitute the percentage who escape This of course may not be literally true

but it is a reasonable assumption *The Supervisors Service Bulletin* ,1924 **Littell's Living Age** ,1896 **The Annals of Hygiene** ,1888 **The New England Magazine** ,1903 **The Lass with the Delicate Air** Michael Arne,1926
