Blake, Deleuzian Aesthetics, and the Digital Claire Colebrook, 2012-01-12 Drawing on recent theories of digital media and on the materiality of words and images this fascinating study makes three original claims about the work of William Blake First Blake offers a critique of digital media His poetry and method of illuminated printing is directed towards uncovering an analogical language Second Blake's work can be read as a performative Finally Blake's work is at one and the same time immanent and transcendent aiming to return all forms of divinity and the sacred to the human imagination stressing that all deities reside in the human breast but it also stresses that the human has powers or potentials that transcend experience and judgement deities reside in the human breast These three claims are explored through the concept of incarnation the incarnation of ideas in words and images the incarnation of words in material books and their copies the incarnation of human actions and events in bodies and the incarnation of spirit in matter

The Journal Book for Teachers of

At-risk College Writers Susan Gardner, Toby Fulwiler, 1999 Educators across the grades and across the curriculum have long recognized the usefulness of journals to help student writers. But what about basic writers, learning disabled students, and nontraditional and returning students? One of the values of journal writing is its accessibility, yet no one has seemed to consider how at-risk students might benefit. With this new collection, the first of its kind, Susan Gardner and Toby Fulwiler provide much-needed advice. The authors of these essays are all experienced teachers of at-risk writers, both at two- and four-year colleges. They know the at-risk students they are describing. Some readers will recognize the students as basic writers in basic writing courses. Others will find chapters written by writing center directors who serve a variety of students we might term as at-risk. There are also chapters from educators who work specifically with Deaf students, ADHD students, and learning disabled students. Each one describes uses of the journal and the adjustments to the assignment that make the journal such an accessible and instructive writing genre.

The Worlds of George RR Martin Tom Huddleston, 2024-09-24 In the many realms of modern fantasy, there is only one true King, and his name is George Raymond Richard Martin. With *A Song of Ice and Fire*, Martin has created a world on a scale almost unrivalled by any other single writer. Approaching two million words and still evolving, this genuinely epic series of novels, with its deeply interlocking narratives, finely crafted drama, and enormous range of characters, is a creation of extraordinary breadth. So how did a writer best known for short stories come to craft such a gigantic sequence of novels, and what is the key to their extraordinary success? What sources, historical, literary, and personal, did Martin draw upon in the writing, and what inspiration did they give him? *The Worlds of George R R Martin* is an in-depth bringing together of the enormous range of inspirations behind Martin's work, from historical borrowings as wide-ranging as the Roman Empire, the Wars of the Roses, and the Mongol conquests, to diverse literary and mythological texts, and Martin's own family experience and biography.

Composing Other Spaces Douglas Reichert Powell, John Paul Tassoni, 2009 From publisher's description: These essays ask how place and space shape the conflicts, challenges, and opportunities of writing instruction. What new tactics for writing, and the teaching of writing, are required to adequately account for and engage with the complexities of composition's spaces and places.

Grading in the Post-process Classroom Libby Allison, Lizbeth Bryant, Maureen M. Hourigan, 1997 *Grading in the Post-Process Classroom* tackles that all-important and difficult issue: How do we fulfill our responsibilities to the traditional academy and still teach our students to become resistant critical thinkers? While the question is not new, new faces and voices in the field, as well as the advent of virtual writing classrooms, require different responses. Currently, most articles on the subject of grading end with the suggestion that teachers should not give grades; an alternative that few instructors find viable, especially in an era of increasing calls for teacher accountability. *Grading in the Post-Process Classroom* answers the question of what to do when theory and practice collide. In addition to discussions of the ideology of grading, it offers specific, alternative, theoretically informed grading schemes, from narrative evaluation, contract grading, and new ways to configure portfolio grading, to how to grade in

cyberspace Included are pieces by both established scholars and new voices in the field Interspersed among the theory chapters are shorter personal self reflexive essays that consider how to negotiate political pressures within a department
