Navigating Trends and Challenges in Educational Professionalism Arumugam Raman, Indu H., Thiyaagu K., Priya M. G., Sundaresan Gayatri Devi, Asha Priya Thangavelu, Rajalakshmi Sular Anbalagan, 2025-12-19 Educational Professionalism encompasses qualities such as industriousness diligence organization and a sense of accountability for one's thoughts words and actions It necessitates specialized knowledge a specific skill set strong work ethics and consistent appropriate behavior Consequently it entails reliability and a genuine concern for every aspect of education The role of educators embodies well established values guiding students to develop into notable human beings However the process for achieving this is intricately structured and graded originating from a deep understanding of educational professionalism The Research Topic intends to include effective teaching practices ethical considerations in education and the impact of professional development on teaching quality The collection will provide insights into contemporary problems or opportunities within the education sector practical insights and tools for educators to enhance their professional development It creates a platform for educators and researchers to reflect on and discuss the importance of educational professionalism Joshua L Glazer has proposed a theoretical frame for understanding the complex relationships between instructional practice and professionalism illustrating how practice both shapes and is shaped by public perception of the profession and how this bears on education's professional strength The framework highlights vital levers for improvement less emphasized in past research and draws

attention to how most professions control practice and the viability of these mechanisms in education A study by Linda Darling Hammond 2017 shows that compelling professional learning experiences typically incorporate most or all of these elements 1 is content focused 2 Incorporates active learning utilizing adult learning theory 3 Supports collaboration typically in job embedded contexts 4 Uses models and modeling of effective practice 5 Provides coaching and expert support 6 Offers opportunities for feedback and reflection 7 Is of sustained duration The study tested by Gennifer Gore et al 2023 was a pedagogy based collaborative teacher Professional Development approach for impact on the quality of teaching This study illuminates how to support teacher learning for measurable positive impacts on teaching quality and teacher morale Authors such as Stronge and Tucker 2000 agree that the teacher is the most important school based factor in student achievement However uncertainty remains about what comprises effective or professional teaching By understanding and sharing a standard definition of professional and effective one can improve teaching so that more students will benefit from successful educational experiences In their paper 2004 Mercedes S Tichenor and John M Tichenor examine what it means to be a professional and exhibit professionalism in education from the perspective of practicing teachers Nihan Demirkas mo lu 2011 argues that teacher professionalism means meeting specific standards in education and it is related to proficiency Teacher professionalism is a daily requirement for working with the nation s future children with various characteristics none of which are the same Professional instructors are educators with a wide range of skills Rialdi 2022 In essence educational professionalism is the cornerstone of quality education It ensures that educators provide the best possible educational experiences while upholding the highest standards of ethics integrity and respect ultimately shaping the future of students and society Leda Kamenopoulou 2016 critically discusses some benefits and limitations of using Ecological Systems Theory EST in research on Inclusion and Special Educational Needs Disabilities SEN D In support of this discussion she has drawn on reflections from a study she conducted on the social inclusion and participation of young people with dual sensory impairment in mainstream schools The effects of COVID 19 and globalization have brought about cultural shifts that are influencing the education sector resulting in consequences that often perplex educators In many instances educators require new strategies and exposure to novel learning approaches to effectively carry out their daily responsibilities Teaching is more than imparting knowledge it is inspiring change Learning is more than absorbing facts it is acquiring understanding William Arthur Ward The post Method era is a period of intense inquiry and research in all fields of study This age calls for efforts to reconstruct the relationship between theories and practices thus enabling teachers to construct classroom oriented theories of pedagogical practice In today s post modern world the role of a teacher has changed a lot and has become very challenging We must keep ourselves abreast with technological advancement and make the utmost use of technological development to make the classroom a space of inquiry interaction and exuberance Professionalism in the field of education involves interacting with students colleagues administrators parents and other members of the community in an appropriate

and respectful way that encourages a successful learning environment The primary goal is to encourage research in the field of education and the application of theoretical knowledge in classrooms We welcome submissions that will contribute towards molding visionaries of high quality education By examining the importance of educational professionalism authors can contemplate the enhancement of the skill sets of teachers across all levels of education like counselors educational psychologists child psychologists and social workers Research works that go beyond boundaries towards a brighter future for the coming generation by redefining the role of educators and trying to comprehend the nuances of educational professionalism are encouraged We invite high quality research articles that address but are not limited to the following themes Biological Medical Approach and Strategies in Education Psychological Approach and Strategies in Education Family Approach and Strategies in Education Moral Approach and Strategies in Education Philosophical Approach and Strategies in Education Physiological Approach and Strategies in Education Sociological Approach and Strategies in Education Ecological Approach and Strategies in Education Community Cultural Approach and Strategies in Education Technological Approach and Strategies in Education Spiritual Approach and Strategies in Education Professional Pedagogy Andragogy Heutagogy Peeragogy effective peer learning and Cybergogy engaging students in an online environment Classroom Action Research Challenges in 21st Century Higher Education Stakeholders Responsibility Assessment and Evaluation Holistic Education Other relevant topics may also be submitted Submissions that address varied aspects both theoretical conceptualizations and empirical studies may be in the form of short communications letters short or long research articles reviews mini reviews conceptual analyses and more Authors are encouraged to submit manuscripts adhering to the journal s guidelines This research topic serves as a path breaking initiative to propel discourse on holistic education in the post modern era inviting a wide gamut of perspectives and contributions from the academic community
