A Metaverse for the Good: Design, Application and Understanding Maria V. Sanchez-Vives,Mel Slater,Omar Niamut,Xueni Pan,Lucio Lamberti,Anna Kobusinska,Piotr Skrzypczynski,Doron Friedman,Aurelio López-Tarruella Martínez ,Matthias Quent,2026-01-16 The metaverse is a large scale social environment based on the convergence of virtual and physical reality Participants can take part in the metaverse through virtual augmented or mixed reality They can carry out everyday activities together ranging

from entertainment through to education business politics health or even legal proceedings This may have a profound impact on the way we live providing new beneficial ways of carrying out a multitude of activities but may also introduce a multitude of problems that we cannot envisage Mobile devices in conjunction with the world wide web and social media have led to revolutionary changes in society including on the positive side deep connectivity between people but on the other a potential threat to democracy The immersive nature of the metaverse will potentially enhance both the positive and negative impact by an order of magnitude The metaverse is an idea rather than a reality There exist systems that offer nascent examples of a metaverse such as VRChat Horizon Worlds Decentraland and others but these are virtual environments that can be visited simultaneously by a multitude of participants who can see avatars of one another and interact together in limited ways Such systems have been around since the 1990s usually called collaborative virtual environments CVEs The modern versions introduce conceptually nothing new except for their scale in implementation Even the avatars often used today are hardly more elaborate than those that were used in the 1990s and early 2000s although today we have the possibility of using personalized avatars of increasing quality Therefore the central problem to be addressed in this Research Topic is to foresee how a metaverse might actually go beyond the well known idea and implementations of CVEs How will experiences in the metaverse be different from experiences in CVEs What technology underpins the creation of such a metaverse What applications are likely to emerge across a range of activities that are likely to be positive for humanity What are the ethical legal and political implications both positive and dangers Primarily what evidence can be offered to support the views or findings of the authors This Research Topic is in conjunction with the conference A Metaverse for the Good although submissions that were not initially presented at this conference are also welcome Papers may be of any of the types afforded by Frontiers although those that include empirical evidence for the arguments that they present will be prioritized The themes of the Research Topic include the following ideally including specific evidentiary examples Metaverse as an agent for a more inclusive responsible and sustainable business and economic environment The economic impact of the metaverse on companies industries and economies The future of work for example whether working from home in immersive real time collaboration with others around the world including with people physically present at the workplace will be feasible Are there examples of this today New models for metaverse based education massive online physical and virtual classrooms that anyone can join from anywhere The use of AI in the foundations implementation and applications in a metaverse The impact of immersive experiences on the individuals in terms of learning engagement self efficacy Technical challenges including computer graphics distributed and networked systems block chain human computer interaction Neurotechnology for example whether people will be able to interact in the metaverse through brain computer interfaces and the impact for people with physical disabilities Ethical regulatory and legal aspects ranging from ethical problems including the use of AI how the metaverse might be regulated The metaverse for medical and psychiatric treatment Society Without People

Christopher Pieper, Justin Nelson, 2025-06-16 Society Without People is the first major scholarly analysis of the profound social and cultural effects of emerging technologies such as generative AI and the Metaverse Using an approachable style and compelling scenarios Pieper and Nelson examine the potential ways these technologies will shape identity institutions relationships communities power and personhood itself in the near future Introducing the theory of Gamism the authors suggest that the logic of games could serve as the new ideology governing this strange exciting world One question underlies each chapter how can humans flourish in the midst of such rapid and deep changes It is a must read for anyone concerned about the future of society and technology *Metaverse and Sustainable Business Models in SMEs* Hussain, Zahid, Khan, Arman, Majeed, Muhammad Ussama, Albattat, Ahmad, 2025-01-31 Small and medium sized enterprises SMEs face unique challenges and opportunities in achieving sustainability goals Through actionable strategies for leveraging the metaverse though it becomes possible to build sustainable business models through metaverse powered product development enhanced customer engagement optimized supply chains and blockchain based solutions The impact of metaverse initiatives implemented in SMEs on sustainability is informative for future trends and policy recommendations Metaverse and Sustainable Business Models in SMEs explores the transformative potential of the metaverse for SMEs seeking sustainable growth by bridging the gap between emerging technology and environmental responsibility providing practical guidance for SMEs to harness the metaverse s immersive and interactive nature Ultimately this book empowers SMEs to become leaders in the metaverse economy while contributing to a more sustainable future Covering topics such as brand accessibility service dynamics and carbon neutrality this book is an excellent resource for business leaders policymakers computer scientists professionals scholars researchers academicians and more **The Essential Guide to Crypto, NFTs, and Blockchain Gaming** Niranjana Bharadwaj, 2025-01-03 The illustrations in this book are created by Team Educohack The Essential Guide to Crypto NFTs and Blockchain Gaming is your comprehensive resource for navigating the transformative world of blockchain technology We provide clear insights into potential pitfalls including privacy issues data security and the challenges of maintaining trust in a decentralized network Our book answers urgent questions about the future of the Internet covering technological advancements that will shape our lives We explore how blockchain innovation offers a groundbreaking solution to the problem of trust in digital transactions By creating a decentralized network of trusted sources blockchain ensures security and reliability This new level of trust is vital for the future of online interactions We balance technical references with practical examples showcasing current and future applications of blockchain technology across various industries Our book highlights the transformative impact of blockchain on sectors like finance healthcare regulation and more Throughout the book you ll find examples illustrating key concepts from the history of blockchain to its essential components like distributed trust and encryption We also cover advanced topics such as Ethereum s capabilities and blockchain as a service providing a clear guide for leveraging blockchain technology in your business **Exploring the**
