The Heath:

The Heath Government 1970-74 Stuart Ball, A. Seldon, 2014-01-14 Only now is it possible to see Edward Heath's controversial administration 1970-1974 in a balanced historical perspective and increasingly it seems a turning point for postwar Britain. This timely volume explores the agenda of the Heath government in all its aspects including economy, industrial relations, social policy, immigration, Northern Ireland, British entry into Europe, and foreign relations, assessing how far it achieved its aims and examines the response to them. The book is based upon much new research, including the archives of the Conservative Party and the TUC, and interviews with many of those involved at the heart of government. The result will be essential reading for anyone interested in modern British history, politics, and government. Contributors include PAUL ARTHUR LEWIS, BASTON VERNON BOGDANOR, ALEC CAIRNCROSS, CHRISTOPHER HILL, DENNIS KAVANAGH, ZIG LAYTON, HENRY CHRISTOPHER LORD, RODNEY LOWE, JOHN RAMSDEN, ROBERT TAYLOR, KEVIN THEAKSTON, JOHN YOUNG. *The Heath Handbook* Langdon Elsbree, Gerald P. Landscape in the Longue Durée Christopher Tilley, 2017-10-06 Pebbles are usually found only on the beach in the liminal space between land and sea. But what happens when pebbles extend inland and create a ridge brushing against the sky? Landscape in the Longue Durée is a 4,000-year history of pebbles. It is based on the results of a four-year archaeological research project of the east Devon Pebblebed heathlands, a fascinating and geologically unique landscape in the UK whose bedrock is composed entirely of water-rounded pebbles. Christopher Tilley uses this landscape to argue that pebbles are like no other kind of stone; they occupy an especial place both in the prehistoric past and in our contemporary culture. It is for this reason that we must re-think continuity and change in a radically new way by considering embodied relations between people and things over the long term. Dividing the book into two parts, Tilley first explores the prehistoric landscape from the Mesolithic to the end of the Iron Age and follows with an analysis of the same landscape from the eighteenth into the twenty-first century. The major findings of the four-year study are revealed through this chronological journey from archaeological discoveries such as the excavation of three early Bronze Age cairns to the documentation of all 829 surviving pebble structures and beyond to the impact of the landscape on local economies and its importance today as a military training camp. The results of the study will inform many disciplines, including archaeology, cultural and art history, anthropology, conservation, and landscape studies. **Forest and Stream**, 1906. Thomas Hardy Henson explores the way gender attitudes are expressed both in descriptions of physical and metaphorical landscape and in the idea of nature through the gendered voices of the narrators Henson looks at the influence of changing aesthetic theory arguing that factors such as scientific enquiry and industrialization changed the representation of landscape and of Englishness in these realist novels
