Gospel, Stephen Wood, 2003 Comprises a collection of papers [The Politics of Animal Experimentation](#) Dan Lyons, 2016-01-12 The reality of animal experimentation and its regulation in Britain have been hidden behind a curtain of secrecy since its emergence as a political controversy in the 1870s Public debate and political science alike have been severely hampered by a profound lack of reliable information about the practice In this remarkable study Dan Lyons advances and applies policy network analysis to investigate the evolution of British animal research policy making

**Civil Society and Governance in Europe** William A. Maloney, Jan W. Van Deth, 2008-01-01 The research presented in this book based on new primary data demonstrates that in terms of civil society actors adapting to the European political space the Europeanization process has an uneven development This innovative book integrates top down approaches for the study of relationships within the developing EU multilevel system i e the consequences of Europeanization for civil society at the local level and bottom up approaches i e the consequences of civil society for the process of European integration and democracy in the EU The contributors argue that exploration of these recursive linkages requires a rethinking of the relationships between local national and trans national civil society on the one hand and multi level governance on the other In analyzing the opportunities for civil society associations to contribute to European integration and decision making from various perspectives the following findings are presented amongst others engagement with and confidence in the EU compared to national institutions is relatively weak among associational members party elites play a key gatekeeper role in the European space the EU and interest groups have had limited success in stimulating the development of citizen engagement civil society and social capital in various countries In the rapidly expanding field of research on democratic decision making in Europe this book will be welcomed by academics and scholars alike at postgraduate levels and above Experts working in the field of European decision making such as lawyers and lobbyists who are looking for conclusions based on high quality empirical research will also find much in this book to engage them

**The Economic Constitution** Tony Prosser, 2014-03-13 There has been little analysis of the constitutional framework for management of the UK economy either in constitutional law or regulatory studies This is in contrast to many other countries where the concept of an economic constitution is well established as it is in the law of the European Union Given the extensive role of the state in attempting to resolve recent financial crises in the UK and elsewhere in Europe it is particularly important to develop such an analysis This book sets out different meanings of an economic constitution and applies them to key areas of economic management including taxation and public borrowing the management of public spending including the Spending Review monetary policy financial services regulation industrial policy including state shareholdings and government contracting It analyses the key institutions involved such as the Treasury and the Bank of England also including a number of less well known bodies such as the Office for Budget Responsibility There is also coverage of the international context in which these institutions operate especially the European Union and the World Trade Organisation It thus provides an account of the public law applying to economic management in the UK This book also adopts a critical approach assessing the degree to which there is coherence in the arrangements for economic management the degree to which economic policy making is constrained by constitutional norms and the degree to which economic
