the various manufacturers The 802.11 specification as a standard for wireless LANs was ratified by the Institute of Electrical and Electronics Engineers IEEE in the year 1997 This version of 802.11 provides for 1 Mbps and 2 Mbps data rates and a set of fundamental signaling methods and other services Like all IEEE 802 standards the 802.11 standards focus on the bottom two levels the ISO model the physical layer and link layer Any LAN application network operating system protocol including TCP/IP and Novell NetWare will run on an 802.11 compliant WLAN as easily as they run over Ethernet What is inside
