Wozu Systeme:

Exclusion and Socio-cultural Identities Urs Stäheli, Rudolf Stichweh, 2002 No detailed description available for Inclusion Exclusion and Socio Cultural Identities

Observing Society , The Performative Enterprise Alexander Tsigkas, 2021-10-01 This book is about quality redundancy and its replacement by the performativity norm Performativity is a linguistic social and political mechanism that produces the intended performance The author Alexander Tsigkas sees this book as a natural continuation of his prior book *The Lean Enterprise From the Mass Economy to the Economy of One* He argues that performativity is the flip side of quality on a coin called identity and in postmodernism that is in the age of Industry 4.0 and beyond companies should be aiming for performativity and achieve quality as one of its many consequences The author therefore encourages modern businesses to transition from quality orientation as conformance alone to a performance orientation The author brings forward historic current and philosophical perspectives in charting performativity as a new goal for modern businesses Many examples case studies and conceptual constructs are used to drive in the idea of how to create a performative enterprise

The Family Business as a Socialisation Context for the Children of Entrepreneurs Simon Caspary, 2024-05-28 Simon Caspary examines how the socialisation of offspring from entrepreneurial families is influenced by the existence of a family business To answer the initial question a pluralistic approach is chosen that maps the mechanisms and influencing variables on the socialisation and identity formation of the offspring In addition to a dedicated overview of the relevant literature the comprehensive theoretical review makes a significant contribution to advancing knowledge of the socialisation context of family businesses in academic discourse

Soziologische Jurisprudenz Graf-Peter Calliess, 2009 Die Festschrift Soziologische Jurisprudenz stellt sich sowohl im Inhalt als auch in der Form in die Tradition der Arbeiten von Gunther Teubner Die Beiträge lassen sich auf seine Leitperspektive ein indem sie die Grenzbeziehungen von Recht und Gesellschaft mit je eigenständigen Akzentuierungen reflektieren

The Evolutionary Dynamics of Discursive Knowledge Loet Leydesdorff, 2021-01-01 This open access book addresses three themes which have been central to Leydesdorff's research 1 the dynamics of science technology and innovation 2 the scientometric operationalization of these concept and 3 the elaboration in terms of a Triple Helix of university industry government relations In this study I discuss the relations among these themes Using Luhmann's social systems theory for modelling meaning processing and Shannon's theory for information processing I show that synergy can add new options to an innovation system as redundancy The capacity to develop new options is more important for innovation than past performance Entertaining a model of possible future states makes a knowledge based system increasingly anticipatory The trade off between the incursion of future states on the historical developments can be measured using the Triple Helix synergy indicator This is shown for example for the Italian national and regional systems of innovation

System und Mythos Axel Roderich Werner, 2014-03-15 Das filmische *uvre* Peter Greenaways wird in diesem Buch als System im Sinne Niklas Luhmanns beschrieben Axel Roderich Werner zeigt

wie sich Greenaways mediale Mythologie als Selbstbeobachtung der Medienkultur der gegenwärtigen Informationsgesellschaft fassen lässt die verdichtet in künstlerischen Reflexionsprodukten abfließt und dabei schließlich auch nach dem Verbleib des menschlichen Subjektes fragt Cinema is dead long live cinema In dieser Weise beschreibt das System Peter Greenaway eine geradezu apokalyptische Mythologie von den Ursprüngen der Geburt dem Tod und der Wiederauferstehung des Kinos im Angesicht der Ankunft der digitalen Technologien

The Knowledge-based Economy Loet Leydesdorff, 2006 Challenging theoretically rich yet anchored in detailed empirical analysis Loet Leydesdorff's exploration of the dynamics of the knowledge economy is a major contribution to the field Drawing on his expertise in science and technology studies systems theory and his internationally respected work on the triple helix the book provides a radically new modelling and simulation of knowledge systems capturing the articulation of structure communication and agency therein This work will be of immense interest to both theorists of the knowledge economy and practitioners in science policy Andrew Webster Science Technology Studies University of York UK _____ This book is a ground breaking collection of theory and techniques to help understand the internal dynamics of the modern knowledge based economy including issues such as stability anticipation and interactions amongst components The combination of theory measurement and modelling gives the necessary power with which to address the complexity of modern networked social systems Each on its own would partly illuminate an innovation system but the combination sheds a far brighter light Mike Thelwall Information Science University of Wolverhampton UK _____ The sociologist Niklas Luhmann is considered one of the few social scientists possibly able to explain a decisive event once it has happened In this book Loet Leydesdorff answers the challenge to take Luhmann's analysis one step further by introducing anticipation into the theory This book provides a fascinating exploration of the use of recursion and incursion to model social processes Dirk Baecker Sociology Universität Witten Herdecke Germany _____ How can an economy based on something as volatile as knowledge be sustained The urgency of improving our understanding of a knowledge based economy provides the context and necessity of this study In a previous study entitled A Sociological Theory of Communications The Self Organization of the Knowledge based Society 2001 the author specified knowledge based systems from a sociological perspective In this book he takes this theory one step further and demonstrates how the knowledge base of an economic system can be operationalized both in terms of measurement and by providing simulation models

Elemente Der Psychophysik Gustav Theodor Fechner, 1889 Speculative Entwicklung der Hauptssysteme der neueren Philosophie von Descartes bis Hegel Johann Nepomuk Paul Oischinger, 1853 Autopoietic Organization Theory Tore Bakken, Tor Hernes, 2003 In bringing together authors from different European countries and institutions as well as from different disciplines this anthology introduces the reader to selected areas of Luhmann's autopoiesis that have bearing on organization theory It discusses aspects that are of particular interest to both theoretical and empirical organization
