

DIVINE COMMAND THEORY

Divine command theory is a philosophical theory that suggests that morality and ethical behavior are derived from the commands of God or Gods.

OVERVIEW

Divine command theory can be traced back to antiquity when Greek philosophers like Plato pondered whether a higher power had established an absolute moral code. In Christian thought, divine command theory has roots in St Augustine's belief that good deeds are to be performed to obey God's commands rather than personal desire.

KEY CONCEPTS

- **God's Sovereignty:** God's will is absolute and is the foundation for all moral principles.
- **Objective Moral Standards:** objective moral standards exist beyond human opinion or cultural relativism.
- **Moral Simplicity:** every action can be definitively categorized as right or wrong by comparing it against God's commands.

Hughes, 1978 **Christian Ethics and Contemporary Philosophy** Ian T. Ramsey, 2011-06-07 In a time when more and more people are discovering they can have a rational morality without an orthodox God, these twenty-four essays reappraise the whole character of Christian ethics and criticize the traditional underpinning of morality by religion Edited by Ian T. Ramsey, professor of philosophy at Oxford University, the volume is a valuable sequel to the well-known *New Essays in Philosophical Theology* The contributors include atheists, agnostics, and Christians Among them are Ninian Smart, R. B. Braithwaite, Ronald Hepburn, and Iris Murdoch The essays do not attempt to examine specific Christian questions in any sort of theological detail; rather, their primary concern is with problems that arise principally in a philosophical context But they are concerned with issues that lie behind the present bewilderment in Christian morality Stressing the diversity of moral situations, the papers show that these are far from being homogeneous and rule-determined Moral decision demands personal involvement, activating the possibility of good and bad reasons for making such a decision The essays point out the character of moral disagreements and also remind us that morality is not only of individual but also of social significance The last section of the book examines the present concept of natural law, its possible erosion by developments in anthropology, psychology, and philosophy, and whether the possibility exists for a theory of morality that unites both natural law theory and Christian ethics The Identity of Christian Morality Ann Marie Mealey, 2009 This book argues that moral theology has yet

to embrace the recommendations of the Second Vatican Council concerning the ways in which moral theology is to be renewed There is little or no consensus between theologians regarding the nature content and uniqueness of Christian morality After highlighting the strengths and weaknesses of the so called autonomy and faith ethic schools of thought Mealey argues that there is little dividing them and that in some instances both schools are simply defending one aspect of a hermeneutical dialectic In an attempt to move away from the divisions between proponents of the faith ethic and autonomy positions Mealey enlists the help of the hermeneutical theory of Paul Ricoeur arguing that the debate on the uniqueness of Christian morality can be mediated if scholars look to the possibilities opened up by Ricoeur s hermeneutics of interpretation Mealey also argues that the uniqueness of Christian morality is more adequately explained in terms of a specific identity self that is constantly subject to change and revision in light of many often conflicting moral sources She advocates a move away from attempts to explain the uniqueness of Christian morality in terms of one specific unchanging context motivation norm or divine command or value By embracing the possibilities opened up by Ricoeurian hermeneutics Mealey explains how concepts such as revelation tradition orthodoxy and moral conscience may be understood in a hermeneutical way without being deemed sectarian or unorthodox
