Young, 1993 In 1990 EPA released a series of Standard Test Procedures for Evaluating Leak Detection Methods to define consistent rigorous procedures for determining the performance of underground storage tank leak detection methods Each test procedure outlines one or more ways to

evaluate the performance of a class of leak detection devices Liquid and vapor phase detectors are tested for their ability to detect the presence of petroleum components in controlled laboratory settings Pipeline leak detectors tightness testing methods and automatic tank gauging systems are tested for their ability to reliably differentiate between non leaking systems and systems with simulated leaks of specified sizes Statistical inventory reconciliation methods are tested using real inventory data from tight tanks including some simulated leaks The results of these preliminary evaluations are discussed and compared The test procedures allow manufacturers to demonstrate the effectiveness of their methods and help tank owners to ensure that the equipment or service they purchase complies with applicable regulatory requirements *Leak Detection Performance of Underground Storage Tanks* Jennifer Nakayama-Curry,2000 *Environmental Engineers' Handbook on CD-ROM* David H.F.
