Troubled Waters Mehran Kamrava,2018-05-15 This text examines the causes and consequences of each of those dynamics both individually and collectively that have made this small waterway and its surrounding areas one of the most volatile and tension filled regions in the world This pervasive insecurity the book argues is largely a product of four interrelated developments

Yemen - U.S. Relations: the External and Internal Dynamics: 18th CENTURY - 2012 Dr. Moath A. Alrefaei,2024-06-22 US Yemeni relations are enveloped in mysteries that have never been fully unraveled Historically these relations have fluctuated dramatically improving momentarily before deteriorating once again The literature on Yemen US relations is riddled with inconsistencies and rarely delves deep into the dynamics at the core of this relationship often overlooking the underlying complexities This book addresses these key issues by exploring the myriad dynamics that drive bilateral relations between the two nations It asserts that Yemen US relations are governed by a complex array of factors broadly categorized as external and internal These dynamics are fluid shifting with the ever changing global environment and circumstances making each stage of the relationship distinct from the next Through a detailed analysis this book offers a new interpretation of the systematic changes in Yemen US relations and their future prospects It highlights the wide range of dynamics characterized by their plurality overlap and dual influence that contribute to the instability and oscillation defining this relationship Externally factors such as regional geo strategic considerations and the legacies of the Cold War alongside the

democratization and human rights agenda in the new international order have predominantly shaped the relations. Conversely the influence of internal factors was traditionally marginal due to weak mutual interests but this changed dramatically after the September 11 attacks. The escalating threats to homeland security posed by terrorist groups in both nations brought a new dimension to the relationship. Internal dynamics such as Yemen's conflict with al Qaeda, its economic and developmental needs and the country's overall instability were significant in shaping the bilateral relations during the first decade of this century. However their influence has since evolved marking a new era in the relationship between Yemen and the US. This book stands out from others discussing the general state of Yemeni and American relations in two key ways. First it avoids the conventional chronological approach that often becomes tedious, opting instead for an analytical methodology that interprets changes in relations based on dominant factors. Second it employs established scientific and methodological approaches from political science and international relations to ensure objectivity and enhance its scholarly integrity.

Globalization and Security G. Honor Fagan, 2009. Broad in scope this two volume set covers the economic and political aspects of globalization as well as its social and cultural impacts.

Arms Control and Disarmament, Defense and Military, International Security, and Peace Stephen E. Atkins, 1989.

Understanding International Conflicts Joseph S. Nye, 1997. Deftly balancing theory and history Nye aims to introduce the complexities of international politics. He examines such questions as whether there is an enduring logic of conflict in world politics and looks at interdependence and power.

International security is an ambiguous concept it has many meanings to many people. Without an idea of how the world works or how security is defined and achieved it is impossible to create effective policies to provide security. This textbook clarifies the concept of security, the debates around it, how it is defined and how it is pursued. Tracking scholarly approaches within security studies against empirical developments in international affairs, historical and contemporary security issues are examined through various theoretical and conceptual models. Chapters cover a wide range of topics including war and warfare, political violence and terrorism, cyber security, environmental security, energy security, economic security and global public health. Students are supported by illustrative vignettes, bolded key terms and an end of book glossary. Maps, box features, discussion questions and further reading suggestions and instructors have access to adaptable lecture slides.

Arms Control, Disarmament and International Security, 1987 *Rethinking Global Security* Andrew

Martin, Patrice Petro, 2006. Analysts today routinely look toward the media and popular culture as a way of understanding global security. Although only a decade ago such a focus would have seemed out of place, the proliferation of digital technologies in the twenty first century has transformed our knowledge of near and distant events so that it has become impossible to separate the politics of war, suffering, terrorism and security from the practices and processes of the media. In *Rethinking Global Security* Andrew Martin and Patrice Petro bring together ten path breaking essays that explore the ways

that our notions of fear insecurity and danger are fostered by intermediary sources such as television radio film satellite imaging and the Internet The contributors who represent a wide variety of disciplines including communications art history media studies women s studies and literature show how both fictional and fact based threats to global security have helped to create and sustain a culture that is deeply distrustful of images stories reports and policy decisions Topics range from the Patriot Act to the censorship of media personalities such as Howard Stern to the role that Buffy the Vampire Slayer and other television programming play as an interpretative frame for current events Designed to promote strategic thinking about the relationships between media popular culture and global security this book is essential reading for scholars of international relations technology and media studies Global Politics Ben Whitham,Andrew Heywood,2023-03-31 In turbulent global times your study of this subject is increasingly necessary and urgent Featuring a new chapter on critical theories and revised to take a less Eurocentric approach to concepts and case studies this new edition allows you to tackle global politics important concepts debates and problems How can theories help us to understand the politics of a global pandemic Do we live in a post truth world of fake news and disinformation Does international aid work Does the United States remain a global hegemon What is the Anthropocene and how does it shape global politics Are global politics constrained by a North South divide What are the possible futures of global politics and the politics of outer space Delving into topics as diverse as anarchy intersectionality Confucianism and neoconservatism boxed features give you confidence in political analysis Focus on learn more about the global colour line or the tragedy of the commons Key figures discuss the ideas of Hans Morgenthau Frantz Fanon or bell hooks Debating argue whether the United Nations are obsolete or whether nuclear weapons promote peace Global politics in action apply your learning to the migration crisis in Europe or the Arab Spring Approaches to consider human rights or the Covid 19 pandemic from the perspective of realist liberal postcolonial Marxist feminist constructivist and post structuralist theory Global actors understand the significance of Black Lives Matter Amnesty International or the International Monetary Fund Spanning the development of global politics from the early origins of globalization through to the return of multipolarity in the twenty first century this is an essential text for undergraduates studying global politics and international relations *Global Directory of Peace Studies Programs* ,1995 **Development and Peace** ,1988

Transatlantic Diplomacy and the Use of Military Force in the Post-Cold War Era Mark Wintz,2010-09-15 This book examines diplomatic influence and collective decision making within the transatlantic security regime focusing on the four major member states of NATO France Germany the UK and the United States Two cases of post Cold War transatlantic military intervention are examined in which regime member states sought to develop and adopt a single collective policy on the use of military force outside of NATO s territorial area of operations Bosnia Herzegovina and Kosovo The question is what conditions or factors increase or decrease the likelihood of the member states of the transatlantic security regime adopting a common collective policy with regard to military intervention in a given case The author answers that question by testing the

roles of six alternative rival explanations power threat perception international institutions risk analysis perceptual lenses and domestic political pressures **Understanding Global Cultures** Martin J. Gannon,2001 The First Edition of this book introduced a new method the cultural metaphor for understanding the cultural mindset of a nation and comparing it to other nations This new edition develops the method and applies it to a fascinating range of 23 case studies of countries in Europe the Middle East Asia and North and South America *International Security: The transition to the post-Cold War security agenda* Barry Buzan,Lene Hansen,2007
