Achord, 2002 Hepatitis or inflammation of the liver has many causes including several viruses a host of chemicals and drugs bacteria diseases of the immune system inherited factors and herbs For most of the population hepatitis refers to a disease caused by viruses and viral hepatitis is the major concern of this book However many of the nonviral types also are mentioned Every year about 140 000 new cases of hepatitis A occur in the United States and perhaps over a million around the world Because some who are infected do not become ill the statistics are perhaps ten times greater than the number recognized Fortunately this strain is not chronic defined as disease that lasts longer than six months Hepatitis B infects about 1 250 000 in the U S and about 350 000 000 worldwide Hepatitis C unique in many ways and virtually always chronic has produced some 4 000 000 cases in the U S About 1 6 percent of the population has been infected at some time and at least seventy five percent in this group retain the live virus in their blood A fourth virus hepatitis D is uncommon in the United States Because viral hepatitis sometimes has serious acute and chronic consequences reference to it often tends to raise unreasonable fears of death or disability However the majority who become infected suffer few complications or long term effects The infection rate has decreased dramatically in recent years In comprehensible terms Understanding Hepatitis furnishes the reader with a better grasp of the disease Featured in this book are a historical overview a discussion of symptoms and treatment and a report on current research This information not only debunks fearful myths but also provides helpful particulars on how to avoid the risks for contracting hepatitis James L Achord a professor emeritus at the University of Mississippi Medical Center has published articles in such publications as Conn s Current Therapy Gastroenterology and Hepatology Pearls of Wisdom and Clinical Medicine

Taking Employment Discrimination Seriously Yuwen Li, J. E. Goldschmidt, 2009. Employment discrimination is present in any society. However, this severe social problem has escalated in the post-Mao era in China. The imbalance between supply and demand in the labour market, combined with a lack of general consciousness regarding labour rights, have contributed to the swift spread of discrimination. This book contains the most recent research on the reality of discrimination in China and advocates for effective employment equality protection through law and specialised equality institutions. The study of equal treatment in the legal systems of the EU illustrates the important contribution law, together with general policies, can make to the improvement of equality in employment. While both systems face a distinctive range and degree of problems, employment discrimination ought to be taken seriously in China and the countries of the EU.
