years which is nonetheless marred by pervasive levels of poverty and inequality. The issues covered include trade, rural-urban linkages, the dynamics of poverty, vulnerability and welfare, social policies for inclusive and sustainable development, productivity and informality, and financial direct support systems to the poor. The chapters are based on first-hand data, secondary data from different databases, and systematic reviews of academic literature. **Comparing European Workers** David Brady, 2011-06-22. Focuses on the politics, economics, sociology, and history of work and workers in Europe. This title places the labor markets, workplaces, jobs, and workers of Europe in comparative perspective and compares contemporary patterns and the history of European workers with other models of work worldwide.

**Policy Matters** Jose Antonio Ocampo, Jomo Kwame Sundaram, Sarbuland Khan, 2007-03. In 2000, UN member states pledged to halve world poverty by 2015 among other Millennium Development Goals (MDGs). But progress has been elusive since. The chapters in this volume address disparate problems in achieving the UN Development Agenda, from the complex effects of trade and financial liberalisation to the realities of development aid itself, a central pillar of the MDGs. The unifying theme is one of economic and social integration and an emphasis on long-term strategic investments in education, health, and infrastructure.

**World of Work Report 2008** Raymond Torres, 2008. In the majority of countries, the incomes of rich people have grown faster than is the case for their poorer counterparts. To what extent is this a problem for society and the economy? What are the factors behind observed trends, and what can policy makers do to address excessive income inequality? This report looks at these issues comprehensively and provides answers to some of the key questions of today's international debate. **BOOK JACKET**

**Living Wage** Shelley Marshall, 2019-01-17. This book is driven by a quest to re-regulate work to reduce informality and inequality and promote a living wage for more people across the world. It presents the findings of a multidisciplinary study in four countries of varying wealth and development, exploring why people become trapped in precarious work. The accounts describe the impact of supply chain governance, trade agreements, internal and between-country migration, legal factors, as well as the socio-economic characteristics and outlooks of the workers. In a unique approach, the chapters describe existing labour regulation measures that have succeeded but which have to date attracted little scholarly attention. Building on these existing innovations, the book proposes a new international labour law which would incrementally increase the wages of the poor and regulate precarious work in global supply chains. **Economic Report on**

**Africa**, 2009. **IDS Bulletin**, 2008. **Report**, 2006. Growth Divergences Jose Antonio Ocampo, Jomo Kwame Sundaram, Rob Vos, 2007. Unlike the 1950s and 1960s when the rising tide of economic growth lifted most economies, the last three decades have been characterized by a paradox of greater international economic integration as well as divergent economic growth performances. The growing North-South gap of the last two centuries has been moderated recently by the

better economic performance of China India and others in East Asia implying the expansion of the middle income category This volume of analytical studies seeks to explain these major differences in economic performance in recent decades by considering the dynamics of international economic growth diverging growth rates economic structures and sources of demand successes and collapses in the developing world and recent episodes of real income stagnation of countries Several chapters critically review recent misleading claims and the conventional wisdom regarding the relationship of trade liberalization financial development development aid infrastructure spending violent conflict good governance and industrial policy to economic growth
