Understanding Social Research George McKenzie,Jane Powell,Robin Usher,2005-08-04 In 1991 the Economic and Social Research Council ESRC published Postgraduate Taining Guidelines Throughout the document emphasis is placed on the need for universities to make postgraduate research students aware of the methodological issues that affect their work This text explores the relationship between knowledge methodology and research practice across the broad spectrum of the social sciences in language that is accessible to researchers at all levels of their research careers It follows the themes that there is no single practice or correct methodology and that the diversity and variety in terms of methodology and disciplinary focus are a sign of the sophistication and complexity of the proceses of social research The text examines socio cultural contexts of social research and relates them to contemporary shifts in focus such as feminism critical theory and postmodernism The importance of selecting the research methodology most appropriate to the subject discipline concerned is emphasized

Understanding Social Research Angela Dale,Jennifer Mason,2010-12-29 Jennifer Mason and Angela Dale s book seeks to set out cutting edge developments in the field of social research and to encourage students and researchers to consider ways of learning from different approaches and perspectives in such a way as to make their own research richer more insightful and more rewarding

Social Researching brings together a wide variety of research methods both qualitative and quantitative

to help students and researchers to consider the relative benefits of adopting different approaches for their own research work. The authors clearly identify the most appropriate methods for different research questions and also highlight areas where it might be fruitful to complement different methods with each other or exploit creative tensions between them. The book is therefore a highly practical guide which also seeks to draw readers outside their methodological comfort zones. This book includes:

- Critical coverage of issues in research design
- Expert experience in many methodological fields
- An overview of the many different ways to approach similar research problems
- Coverage of the tensions between different methodological approaches
- Examples of excellence in research design and practice
- An examination of how to turn methodological tensions into richer research practice

The methods covered include highly innovative cutting edge approaches and they are demonstrated in terms of their transferability between the different social sciences. This inter disciplinary approach is complimented by a wide range of strategically chosen examples which demonstrate the authors pragmatic and creative take on research design.

Social Research Bruce Curtis, Cate Curtis, 2011-11-14 Original fresh and relevant this is a theoretically informed practical guide to researching social relations. The text provides a mixed methods approach that challenges historical divisions between quantitative and qualitative research. It adopts a multidisciplinary approach to social science research drawing from areas such as sociology, social psychology and social anthropology. Explicitly addressing the concerns of emergent researchers it provides both a how to account of social research and an understanding of the main factors that contextualize research by discussing why do social scientists work this way. Throughout the twelve comprehensive chapters procedural how to accounts and contextual why do issues are usefully applied to major themes and substantive questions. These key themes include:

- 1 Research design
- 2 The practices of research and emergent researchers
- Beyond ontology epistemology and methodology
- 3 The impact of technology on research
- 4 Putting the research approach in context

A superb teaching text this book will be relished by lecturers seeking an authoritative introduction to social research and by students who want an accessible enriching text to guide and inspire them.

The Basics of Social Research Earl Babbie, 2008 This thorough revision of Babbie's standard setting book presents a succinct straightforward introduction to the field of research methods as practiced by social scientists. Contemporary examples such as terrorism, Alzheimer's disease, anti gay prejudice and education and the legalization of marijuana make this Fourth Edition thoroughly fascinating as it introduces you to the how tos and whys of social research methods. The book's new qualitative coverage combined with its already strong quantitative material makes this new edition Babbie's best yet. Babbie long respected in the field and renowned for his engaging and friendly writing style gives you the tools you need for understanding social research methods and for applying these concepts both inside and outside the classroom as a researcher and as a consumer of research. With a strong emphasis on ethics and additional qualitative material this Fourth Edition is authoritative yet student friendly and engaging enough to help you connect the dots between the world of social research and the real world.

Making Sense of Social Research Methodology Pengfei Zhao, Karen Ross, Peiwei Li, Barbara Dennis, 2021-01-04. *Making Sense of Social Research Methodology: A Student and Practitioner Centered Approach* introduces students to research methods by illuminating the underlying assumptions of social science inquiry. Authors Pengfei Zhao, Karen Ross, Peiwei Li, and Barbara Dennis show how research concepts are often an integral part of everyday life through illustrative common scenarios like looking for a recipe or going on a job interview. The authors extrapolate from these personal but ubiquitous experiences to further explain concepts like gathering data or social context so students develop a deeper understanding of research and its applications outside of the classroom. Students from across the social sciences can take this new understanding into their own research, their professional lives, and their personal lives with a new sense of relevancy and urgency. This text is organized into clusters that center on major topics in social science research. The first cluster introduces concepts that are fundamental to all aspects and steps of the research process. These concepts include relationality, identity, ethics, epistemology, validity, and the sociopolitical context within which research occurs. The second and third clusters focus on data and inference. These clusters engage concretely with steps of the research process, including decisions about designing research, generating data, making inferences. Throughout the chapters, Pause and Reflect, open-ended questions provide readers with the space for further inquiry into research concepts and how they apply to life. Research Scenario features in each chapter offer new perspectives on major research topics from leading and emerging voices in methods. Moving from this dialogic perspective to more actionable advice, You and Research features offer students concrete steps for engaging with research. Take your research into the world with *Making Sense of Social Research Methodology: A Student and Practitioner Centered Approach*.
