

Value Driven It Management

M Mosston

Value Driven It Management:

Value-Based Software Engineering Stefan Biffel, Aybuke Aurum, Barry Boehm, Hakan Erdogmus, Paul Grünbacher, 2006-02-23 The IT community has always struggled with questions concerning the value of an organization's investment in software and hardware. It is the goal of value based software engineering (VBSE) to develop models and measures of value which are of use for managers, developers and users as they make tradeoff decisions between, for example, quality and cost or functionality and schedule. Such decisions must be economically feasible and comprehensible to the stakeholders with differing value perspectives. VBSE has its roots in work on software engineering economics pioneered by Barry Boehm in the early 1980s. However, the emergence of a wider scope that defines VBSE is more recent. VBSE extends the merely technical ISO software engineering definition with elements not only from economics but also from cognitive science, finance, management science, behavioral sciences and decision sciences, giving rise to a truly multi-disciplinary framework. Biffel and his co-editors invited leading researchers and structured their contributions into three parts following an introduction into the area by Boehm himself. They first detail the foundations of VBSE, followed by a presentation of state-of-the-art methods and techniques. The third part demonstrates the benefits of VBSE through concrete examples and case studies. This book deviates from the more anecdotal style of many management-oriented software engineering books and so appeals particularly to all readers who are interested in solid foundations for high-level aspects of software engineering decision making, i.e. to product or project managers driven by economics and to software engineering researchers and students.

Value-Based Management in Mittelstand Carola Normann-Tschampel, 2020-01-31 In this book Carola Normann-Tschampel develops an enhanced understanding of the relevance of Value Based Management (VBM) to management practice in Mittelstand. A theory-practice gap is identified based on a unique overview of the field of research. The empirical investigation focuses on three specifically identified areas of management: strategic decision making, objectives, attitudes and uses a specific research approach. The insights gained from taking an interpretive stance towards owner-managers' practical experience provide a valuable basis to further address the overall research gap.

The Anatomy of Change Steen Scheuer, John Damm Scheuer, 2008 Globalization, the new economy and the IT revolution are some of the words used when researchers as well as practitioners try to explain the seemingly ever-increasing speed of change in contemporary society. Whatever the label, organizations today are facing change in a host of different ways. Sometimes they act as change-takers, forced to adapt to changes and innovations coming from the outside. At other times they are change-makers who foster innovation and change, giving them a competitive advantage or a heightened legitimacy. Sometimes they force others to adapt to these changes. The analyses presented in this volume provide ample evidence of how the perspective of new institutionalism can help in understanding the anatomy of change and how some actors avoid complete stasis through utilizing small openings instead of breaking down the whole wall.

Value Driven Management: How To Create And

Maximize Value Over Time For Organizational Success Randolph A. Pohlman,2008 *Exploring Services Science* Theodor Borangiu,Monica Drăgoicea,Henriqueta Nóvoa,2016-05-18 This book contains the refereed proceedings of the 7th International Conference on Exploring Service Science IESS held in Bucharest Romania in May 2016 Service science constitutes an interdisciplinary approach to systematic innovation in service systems integrating managerial social legal and engineering aspects to address the theoretical and practical challenges of the service industry and its economy The 45 full papers and 13 short papers accepted for IESS were selected from 119 submissions The papers consider the topics service exploration theories and processes modeling service requirements and management of business processes value co creation through knowledge management and user centric services service design methodologies and patterns service innovation and strategy IT based service engineering servitization in sustainable manufacturing product service systems business software services and data driven service design web service design and service oriented agents IoT and mobile apps for public transport service management e health services and medical data interoperability and service and IT oriented learning and education systems

Responsibility, Ethics and Legitimacy of Corporations Jacob Dahl Rendtorff,2009 Business ethics corporate social responsibility corporate citizenship values driven management corporate governance and ethical leadership are necessary horizons for the legitimacy of corporations in the process of globalization Based on hermeneutics and institutional analysis this book discusses the place of values in corporations and the role of ethics in management With the theories of business ethics as a starting point it is possible to propose a vision of the good citizen corporation The book presents theories concepts of responsibility for stakeholder justice and basic ethical principles of respect for autonomy dignity integrity and vulnerability This is the foundation for an analysis of the ethical relations to internal and external constituencies of the firm i e shareholders owners investors management employees consumers and local community The interaction with the environment is further analyzed with a focus on ethical principles as the basis for sustainability This investigation culminates with the conceptualization of the firm as a collective and institutional moral agent The content also includes analysis of concrete political developments in the US Europe and the United Nations Finally the book provides a framework for a new corporate strategy based on global business ethics

Ethical Function in Hospital Ethics Committees Guy Lebeer,2002 This monograph was written to present the results of the concerted action called Ethical Function in Hospital Ethics Committees funded by the European Union in the context of the BIOMED II programme Ethics committees as a principle national clinical or for research do appear as quite innovative in the hospital environment They offer an opportunity deep in the clinical practice to think about wide and subtle issues of medicine throughout a variety of discourses coming from philosophy social sciences law and laymen as well
