"Every Valley Shall Be Exalted" Constance Brittain Bouchard, 2017-05-31 In high medieval France men and women saw the world around them as the product of tensions between opposites Imbued with a Christian culture in which a penniless preacher was also the King of Kings and the last were expected to be first twelfth century thinkers brought order to their lives through the creation of opposing categories In a highly original work Constance Brittain Bouchard examines this poorly understood component of twelfth century thought one responsible in her view for the fundamental strangeness of that culture to modern thinking Scholars have long recognized that dialectical reasoning was the basic approach to philosophical legal and theological matters in the high Middle Ages Bouchard argues that this way of thinking and categorizing which she terms a discourse of opposites permeated all aspects of medieval thought She rejects suggestions that it was the result of imprecision and provides evidence that people of that era sought not to reconcile opposing categories but rather to maintain them Bouchard scrutinizes the medieval use of opposites in five broad areas scholasticism romance legal disputes conversion and the construction of gender Drawing on research in a series of previously unedited charters and the earliest glossa manuscripts she demonstrates that this method of constructing reality was a constitutive element of the thought of the period

Preparations for digital switchover Great Britain: National Audit Office, 2008-02-27 In September 2005 the Government after consultation with the broadcasting industry and Ofcom announced a programme to replace analogue television broadcasts with digital television region by region between 2008 and 2012 digital switchover This report considers how this objective is being pursued by the Department for Culture Media and Sport and the Department for Business Enterprise and Regulatory Reform the Departments who have joint responsibility for delivering the policy objective Switchover involves the conversion of more than a thousand television transmitter sites in order to ensure public service broadcasting is available to some 25 million

households in digital instead of analogue form Unless households have at least one television set capable of receiving digital television signals they will lose access to broadcast television after switchover The Departments estimate it will cost the UK economy 4.6 billion mostly borne by consumers through the cost of acquiring and installing digital receiving equipment The Departments estimate the cost will be outweighed by benefits to consumers and business totalling 6.3 billion The programme is progressing well with main set conversion at 85 per cent and a successful switchover in the flagship area of Copeland The complexity of the non contractual delivery and governance arrangements poses inherent risks to the objectives Public awareness of the switchover is high though not in some sections of the population The programme's communications and help scheme activities are funded through ring fenced amounts within the licence fee spent by the BBC and the BBC has started to set performance measures for the 800 million ring fenced for switchover activities Evidence from Copeland suggests that take up of the help scheme might be significantly lower than that anticipated by the Departments in their cost model

"Born Again": A Portrait and Analysis of the Doctrine of Regeneration within Evangelical Protestantism

Stephen J. Hamilton, 2017-04-03 Stephen J Hamilton attempts to create a portrait of born again Christianity by providing a general introduction to the doctrine of regeneration including its development in modernity as well as short exegeses of relevant scriptural texts followed by a close reading of four theologians Philipp Jakob Spener Jonathan Edwards Friedrich D E Schleiermacher and Charles G Finney who all associate the doctrine of regeneration with an experience of presence in the individual believer In light of these analyses he then traces a general theological structure of the born again understanding of regeneration including a catalogue of theological issues over which there is significant disagreement in order to create a topography of born again theologies In the final section he applies these results to contemporary conversion narratives of non theologians It is in such conversion narratives the author argues that theologians can discover an implicit lived theology that reveals how doctrines are perceived and put into practice among Christians Accordingly this is to be understood as the result of the creative reciprocity between often tacit theological convictions and the experiences of the Christian life The final chapter as a coda to the entire work offers some concluding reflections on the present cultural and political situation in the USA pertaining to born again Christianity and argues against any oversimplifications of the relationship between born again theologies culture and politics

Atheists Finding God

Jana S. Harmon, 2023-02-28 In a Western culture of increasing skepticism towards conservative Christianity what motivates intellectually driven atheists to believe in the reality of God and become passionate followers of Christ Review of social science literature confirms a predominant functional approach to religious conversion effectively reducing a complex substantive phenomenon to a partial functional explanation In response the chief focus of this book is to take a broader look at religious conversion to determine the precursors and pathways from atheistic disbelief to belief in God and Christianity within an educated population Findings are drawn from PhD based research evaluating a broad range of functional and substantive variables influencing religious conversion Data was collected

through both survey and interview of fifty educated skeptical atheists in the contemporary West who once held belief God and Christianity as implausible unattractive and irrelevant Yet they became utterly convinced that the Christian faith was true and good worth personal life commitment These former atheists not only experienced a change of their worldview but also a dramatic transformation of their whole world In depth narrative analysis revealed the integrated transformative nature of religious conversion in areas of sense making identity experience meaning and purpose community language and spirituality Overall this book advances the case for using an inclusive transformational perspective in future description conception and modeling for religious conversion of atheists to conservative forms of Christianity **British Muslim**

Understanding Conversion Karl Frederick Morrison, 1992 Examines the ways in which people made sense of religious conversion during the 12th century a critical point in the formation of Western moral values The book also indicates that the understanding of conversions rooted in medieval love of indirect and intricate allegorical symbolism entered the permanent legacy of Western literature and art The idea of conversion became a mythic strategy of survival in conflict against the world the flesh and the devil This book holds that the idea of conversion was a study in aesthetics specifically in a male aesthetic combining the brotherhood that violence engendered among warriors with the inexplicable genius of the poet It explores the ascetic discipline social myth and representational art as components in a vast militantly aggressive education system that served as context defining in the conversion process
