Kovacic, Andres Sousa-Poza, 2013-02-15 With so many terms available to define the same thing it would seem nearly irresponsible to introduce yet another term complex situation to describe a phenomenological state of such as a system However a complex situation infers both a broader meaning and imposes a different perspective Complex in this context is dependent on understanding and reality rather than observer and knowledge Situation imposes a gestalt that cannot be characterized within a singular perspective that relegates paradox to a superior subordinate hierarchy This also infers that complex situation has no monotonic definition or each definition is by default incomplete Therefore the perennial derivations for systems such as complex systems system of systems federation of systems is no longer a sufficient descriptor for complex situation Ergo system and its genealogy lack the constitution to define complex situations The books intent is to explore this pathology through a series of papers written by authors that work in complex situations and have dealt with the limitations of the status quo systems      **Water Diplomacy in Action** Shafiqul Islam, Kaveh Madani, 2017-01-02 Complex water problems cannot be resolved by numbers or narratives Contingent and negotiated approaches are necessary for actionable outcome In the face of a constantly changing array of interconnected water issues that cross multiple boundaries the challenge is how to

translate solutions that emerge from science and technology into the context of real world policy and politics Water Diplomacy in Action addresses this task by synthesizing two emerging ideas complexity science and negotiation theory to understand and manage risks and opportunities for an uncertain water future Rooted in the ideas of complexity science and mutual gains negotiation this edited volume shows why traditional systems engineering approaches may not work for complex problems what emerging tools and techniques are needed and how these are used to resolve complex water problems
