Public Baths and Bathing Habits in Late Antiquity Sadi Maréchal, 2020-01-20 In this book Sadi Maréchal examines the survival transformation and eventual decline of Roman public baths and bathing habits in Italy North Africa and Palestine during Late Antiquity Through the analysis of archaeological remains ancient literature inscriptions and papyri the continued importance of bathhouses as social hubs within the urban fabric is demonstrated thus radically altering common misconceptions of their decline through the rise of Christianity and elite seclusion Persistent ideas about health and hygiene as well as perpetuating ideas of civic self esteem drove people to build restore and praise these focal points of daily life when other classical buildings were left to crumble

Patterns in Freshwater Fish Ecology William J. Matthews, 2012-12-06 Nearly a decade ago I began planning this book with the goal of summarizing the existing body of knowledge on ecology of freshwater fishes in a way similar to that of H B N Hynes comprehensive treatise Ecology of Running Waters for streams The time seemed appropriate as there had been several recent volumes that synthesized much information on a range of topics important in fish ecology from biogeographic to local scales For example the Fish Atlas Lee et al 1980 had provided range maps and basic entry to the original literature for all freshwater fishes in North America and in 1986 Hocutt and Wiley's Zoogeography of North American Fishes provided a detailed synthesis of virtually everything known about distributional ecology of fishes on that continent Tim Berra 1981 had summarized in convenient map form the worldwide distribution of all freshwater fish families and Joe Nelson's 1976 and 1984 editions of Fishes of the World had appeared To complement these big picture views of fish distributions the volume on Community and Evolutionary Ecology of North American Freshwater Fishes edited by David Heins and myself Matthews and Heins 1987 had provided an opportunity for more than 30 individuals or groups to summarize their work on stream fishes albeit mostly for warmwater systems
