good quality palliative care This book begins with the rise of the modern hospice movement begun in 1967 Today there are 8
500 modern hospice projects in 123 countries The hospice has become an iconic building for this new culture This is not a
book about hospitals as such but about what lessons the hospice movement has for new ideas about buildings for healthcare

, 2002 Identity by Design Georgia Butina-Watson, Ian Bentley, 2007-06-07 In a world of increasing globalisation where one
high street becomes interchangeable with the next Identity by Design addresses the idea of place making and the concept of
identity looking at how these things can be considered as an integral part of the design process Structured around a series of
case studies including Prague Mexico Malaysia and Boston the authors discuss an array of design approaches to explain and
define the complex interrelated concepts The concluding sections of the book suggest ideas for practical application in future
design processes With full colour images throughout this book takes the discussion of place identity to the next level and will
be valuable reading for all architects urban designers planners and landscape architects **American Book Publishing**

and easy to follow instructions tools and materials lists and estimates of costs and degree of difficulty **Region** Simon
Richards, Robert Schmidt III, Cagri Sanliturk, Falli Palaiologou, 2023-07-28 This book explores how the concept of region has
evolved over time and shaped architectural culture and practice It questions what the words region and regional mean for
architecture cities and landscapes past and present and speculates on the forms they might take in the future Region is
explored in many thematic guises as a real geographical site of evolving socio economic activity as a mythical locus of
enduring value as a gatekeeper of indigenous crafts and vernacular techniques as a site of architectural and artistic
imagination as a repository of contested conflicted and mobile identities The contributing chapters take these themes from
the theoretical and literary page through to architectural and urban practice and from the scale of the domestic hearth
through to the ocean archipelago and international law enriching the long standing trope of viewing architectural
regionalism purely as a matter of style Curated into four key thematic areas Theorised Regions Contested Regions Heritage
Regions and Future Regions the book incorporates the values concerns and approaches of a truly diverse international

community of scholars curators and practitioners as well as the design work of international students tasked to explore what region means to them
