Deane-Drummond,2021-02-25 Why do humans who seem to be exemplars of virtue also have the capacity to act in atrocious ways What are the roots of tendencies for sin and evil A popular assumption is that it is our animalistic natures that are responsible for human immorality and sin while our moral nature curtails and contains such tendencies through human powers of freedom and higher reason This book challenges such assumptions as being far too simplistic Through a careful engagement with evolutionary and psychological literature Celia Deane Drummond argues that tendencies towards vice are more often than not distortions of the very virtues that are capable of making us good After beginning with Augustine s classic theory of original sin the book probes the philosophical implications of sin s origins in dialogue with the philosophy of Paul Ricoeur Different vices are treated in both individual and collective settings in keeping with a multispecies approach Areas covered include selfishness pride violence anger injustice greed envy gluttony deception lying lust despair anxiety and sloth The work of Thomas Aquinas helps to illuminate and clarify much of this discussion on vice including those vices which are more distinctive for human persons in community with other beings Such an approach amounts to a search for the shadow side of

human nature shadow sophia Facing that shadow is part of a fuller understanding of what makes us human and thus this book is a contribution to both theological anthropology and theological ethics   **A Tangled Web** Walter Raymond,2019-03-13   *The Magic Wand and Magical Review* ,1921   The Last Poems of Susan K.
