

REFLECTIVE TEACHING

DEFINITION

Reflective teaching is a process where teachers reflect on their own teaching practices and learn from their own experiences.

This type of reflection allows teachers to see what works well in their classrooms and what needs improvement. Reflective teaching also helps teachers to understand the impact that their teaching has on students.

EXAMPLES

Examples of reflective teaching include:

- Observing other teachers and comparing their practice to your own.
- Taking notes on your own teaching practice and thinking about ways to improve.
- Asking for feedback from your students to achieve self-improvement.

teacher **Conceptualising Reflection In Teacher Development** James Calderhead, Peter Gates, 2003-09-02 Reflection has become widely recognised as a crucial element in the professional growth of teachers Terms such as reflective teaching enquiry orientated teacher education teachers as researchers and reflective practitioner have become quite prolific in discussions of classroom practice and professional development It is frequently presumed that reflection is an intrinsically good and desirable aspect of teaching and teacher education and that teachers in becoming more reflective will in some sense be better teachers though such claims have been rarely subject to detailed scrutiny Each of the chapters in this book is concerned with exploring the concept of reflection and considering its contributions to teacher education The papers range across different stages of professional development some focusing in particular on pre service education others on in service or professional development generally Some of the papers are concerned with particular strategies for promoting reflection and how they might operate in a teacher education context others dwell more upon a theoretical appreciation of how reflection facilitates in the processes of professional development and how it relates to issues of quality in teacher education

Teach, Reflect, Learn Pete Hall, Alisa Simeral, 2015-04-15 It's not the doing that matters it's the thinking about the doing said John Dewey As a teacher you work hard to make a positive difference in the lives of your students But this kind of progress doesn't happen overnight and it doesn't happen accidentally It's the result of intentionality planning effort and thought The difference between learning a skill and being able to implement it effectively resides in your capacity to engage in deep continuous thought about that skill In other words recognizing why you do something is often more important than knowing how to do it To help you deepen your thinking and reflect on your capacity as an educator Pete Hall and Alisa Simeral return to the Continuum of Self Reflection which they introduced to coaches and administrators in their best selling *Building Teachers Capacity for Success* and redesign its implementation so you can take charge of your own professional growth In these pages you'll find tools specifically made to enhance self reflection on professional practice including the Continuum of Self Reflection and the Reflective Cycle You'll be able to assess your current self reflective tendencies identify opportunities to reflect on your instruction and begin to forge a path toward continuous growth and educational excellence

Action and Reflection in Teacher Education Gareth Rees Harvard, Phil Hodgkinson, 1994 Throughout the world teacher education is once more in the spotlight This book focuses on recent trends and experiences in England and Wales where external pressures have caused tension between the technician model of teacher education in which teachers learn primarily on the job alongside colleagues and traditional forms of teacher education based in higher education institutions This tension superficially replicates an old dichotomy between practice and theory The contributors to this volume reflect on ideas and attempts to integrate theory and practice Key questions and themes recur the balance and relationship between work done in school on the job and work away from the workplace such as in universities teacher education as a partnership activity and the need to critically examine the institutional cultural and historical context in which they work Teacher

Reflections on Transitioning From K-12 to Higher Education Classrooms Broemmel, Amy D., Vines, Nora, 2022-04-15
Education is a field in which reflective practice is imperative for teacher and student success and for maintaining the desire to remain in the profession. During times of uncertainty, particularly as teachers faced the dual pandemics of social injustice and the COVID-19 pandemic over the past year, they have felt demoralized and powerless. As a result, burnout among educators is becoming increasingly prevalent. It is crucial for teachers to hear reflections of others' experiences to remind them that they are not alone in their work, provide opportunities for them to find connections with fellow educators, and encourage them to engage in reflective practices of their own. *Teacher Reflections on Transitioning From K-12 to Higher Education Classrooms* provides a collection of reflections from educators on their varied experiences within education and how and why they have pursued a place in academia. This book speaks to the humanistic side of academia by acknowledging the multiple passions, professions, and pathways that led each of the authors to academia. It is unique in that it is laced with the lived realities of the human side of academia from a shared stories perspective. Covering topics such as lifelong learners and identity shifts, this major reference work is ideal for academicians, researchers, scholars, practitioners, principals, administrators, educators, and students. **Reflective Teaching in Second Language Classrooms** Jack C.

Richards, Charles Lockhart, 1994-03-25 This text introduces teachers to techniques for exploring their own classroom experiences. The paperback edition introduces teachers to techniques for exploring their own classroom experiences. Numerous books deal with classroom observation and research, but this is the first to offer a carefully structured approach to self-observation and self-evaluation. Richards and Lockhart aim to develop a reflective approach to teaching, one in which teachers collect data about their own teaching, examine their attitudes, beliefs, and assumptions, and use the information they obtain as a basis for critical reflection on teaching practices. The approach is not linked to a particular method but rather can be applied to a variety of methodologies and teaching situations. Each chapter includes questions and activities appropriate for group discussion or self-study. **The Purposes, Practices, and Professionalism of Teacher Reflectivity** Edward G.

Pultorak, 2010-03-16 Very little information about the impact of reflection on teacher performance, teacher retention, and student learning is available in teacher preparation programs. This book provides practical and research-based chapters that offer greater clarity about the particular kinds of reflection that matter and avoids talking about teacher reflection generically, which implies that all kinds of reflection are of equal value. This book addresses five very pertinent concepts: 1) teacher reflectivity in theory and research; 2) teacher reflectivity in teacher education programs; 3) teacher reflectivity with teacher candidates; 4) teacher reflectivity in schools and classrooms; and 5) teacher reflectivity and international perspectives.

Reflective Learning and Teaching in Primary Schools Alice Hansen, Adrian Copping, Nick Clough, Mike Pezet, Peter Dudley, Lisa Murtagh, Elizabeth Gowing, Helen Davenport, Emma McVittie, 2012-05-18 Trainee teachers are expected to demonstrate reflective practice in many ways throughout their course. Unlike other texts, this book takes a focused look at

what primary trainees need to know and offers specific and details guidance on how to be meaningfully reflective in learning and teaching Examining reflection as a tool for both teachers and children this text considers how teachers can encourage the children they teach to be reflective in their own learning and how this can improve learning and teaching Chapters on lesson study and reflective journals offer practical guidance and a chapter on using children s voice as a tool for reflection explores this popular topical theme Case studies and activities are included to help the reader relate theory to practice and all chapters are linked to the 2012 Teachers Standards About the Transforming Primary QTS series This series reflects the new creative way schools are begining to teach taking a fresh approach to supporting trainees as they work towards primary QTS Titles provide fully up to date resources focused on teaching a more integrated and inclusive curriculum and texts draw out meaningful and explicit cross curricular links
