The Invention of the English Landscape Peter Borsay, Rosemary Sweet, 2023-07-27 Since at least the Reformation English men and women have been engaged in visiting exploring and portraying in words and images the landscape of their nation The Invention of the English Landscape examines these journeys and investigations to explore how the natural and historic English landscape was reconfigured to become a widely enjoyed cultural and leisure resource Peter Borsay considers the manifold forces behind this transformation such as the rise of consumer culture the media industrial and transport revolutions the Enlightenment Romanticism and the Gothic revival In doing so he reveals the development of a powerful bond between landscape and natural identity against the backdrop of social and political change from the early modern period to the start of the Second World War Borsay s interdisciplinary approach demonstrates how human understandings of the natural world shaped the geography of England and uncovers a wealth of valuable material from novels and poems to paintings that expose historical understandings of the landscape This innovative approach illuminates how the English countryside and historic buildings became cultural icons behind which the nation was rallied during war time and explores the emergence of a post war heritage industry that is now a definitive part of British cultural life
