Wasteworld 1 Aftermath:

Postmodern Apocalypse Richard Dellamora, 1995 From accounts of the Holocaust to representations of AIDS to predictions of environmental disaster from Hal Lindsey's fundamentalist 1970s bestseller *The Late Great Planet Earth* to Francis Fukuyama's *The End of History and the Last Man* in 1992 the sense of apocalypse is very much with us In *Postmodern Apocalypse* Richard Dellamora and his contributors examine apocalypse in works by late twentieth century writers filmmakers and critics *Fables of the Nuclear Age* Kenneth Dean Cooper, 1992 **Science Fiction and Fantasy**

Series and Sequels: Books Tim Cottrill, Martin Harry Greenberg, Charles Gordon Waugh, 1986 **Extrapolation**, 1987

Voices Prophesying War Ignatius Frederick Clarke, 1992 The literature of future wars is an exciting and popular genre embracing classics such as *The War of the Worlds* and mass market bestsellers such as *The Amtrak Wars* Here sci fi meets the spy thriller the war novel meets the novel of dystopia quality fiction meets the bestseller Orwell's *Nineteen Eighty Four* Erskine Childer's *The Riddle of the Sands* and Ray Bradbury's *Fahrenheit 451* are typical in combining critical and commercial success This new edition of *Voices Prophesying War* shows how the genre developed accounts for its success and describes how it is still changing The first examples of such fiction are as much concerned with politics as with war *The Anonymous Reign of George VI* published in 1763 and set in 1918 describes the triumphant imperialism of an English monarch who still leads his troops into battle on horseback A century later the first recognizable classic of the genre *The Battle of Dorking* played on the theme of unpreparedness for war describing a Prussian invasion of the British Isles Imaginary invasions by the French Germans Americans Russians Soviets and of course Martians followed in huge numbers Throughout the nineteenth century novelists wrote with increasing sophistication on the technology of war often as in the case of Conan Doyle and H G Wells they were in advance of the generals and scientists and their prophesies were fulfilled in terrible fashion by two world wars Since the Second World War American authors have come to the fore and the nuclear age has produced such classics as Nevil Shute's *On the Beach* The Cold War has also given rise to a great many bestsellers some like General Sir John Hackett's *The Third World War* marking a return to an older theme of predictions of war by professional soldiers This new edition of *Voices Prophesying War* examines recent work in detail and includes a unique checklist of all major future war fiction in English French and German to have appeared since the eighteenth century **Preventing food losses and waste to achieve food security and sustainability** Prof Elhadi M. Yahia, 2020-03-24 The first comprehensive review of the causes and prevention of food losses and waste FLW bringing together leading experts from around the world Multi dimensional approach in addressing the problem of FLW from a range of perspectives key stages in the supply chain different types of commodity and different regions in the world Valuable case studies from different regions on practical measures to tackle FLW *Nuclear Holocausts* Paul Briens, 1987 The anxiety caused by the thought of nuclear war causes some people to avoid the topic altogether some to despair and others to place unwarranted confidence in scientific or

governmental control However the vivid characters and realistic settings of fiction can bring home the impact of a nuclear war in a way that makes the topic difficult to avoid and allows readers to confront their fears and phobias This bibliography study is the only compilation of its kind to deal exclusively with nuclear war in fiction The first five chapters provide a historical survey of the development of the nuclear war theme and a study of the causes and aftermath of nuclear war as treated in literature In addition Briens considers the significant failure of some works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to provide scholars librarians and general readers with ready access to a great variety of information about his body of writing the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works In his critical analysis and through the annotations in the bibliography Briens attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear weaponry Jacket
