of each chapter is the notion that the world of work and employment relations has changed substantially since the halcyon days of IR throughout the Dunlop Era of the 1950s. However many areas of enquiry remain and more questions have developed with society and technology. This Handbook reflects this view. As the field of study and practice continues to evolve throughout the twenty first century what lessons have we learnt from the past and what can we expect in the future. Academics and postgraduate students researching industrial relations, human resource management, employment relations, industrial sociology and sociology of work will find this important resource invaluable.

The Future of Work, Employment and Social Protection Peter Auer, Bernard Gazier, 2002 This volume comprises the papers and debates of the second France ILO Symposium on the future of work, employment and social protection. Reflecting the aim of the Symposium itself, the book provides in depth reflections on work, employment and social protection. Designed to be more than an account of the discussions, this book is a useful tool for all those interested in labour market transition and the increasing importance of female labour for the future of the labour markets, particularly in the developed world. The book discusses the need for more family friendly policies and a more radical policy of equality between the sexes. The legal dimensions of labour market change are also debated and the book explores the positive and negative sides of globalization and its links with technological change.
