Some Main Problems Of Philosophy:

Some Main Problems of Philosophy George Edward Moore, 2014-04-04 First published in 2002 This title collates a number of the late G E Moore s lectures on philosophy with the inclusion of his audience s questions and his answers that would bookend each session Moore manages to present central limiting typical problems discussed in the study of philosophy in such a way that the reader begins to feel them despite themselves Moore s introduction to philosophical difficulties can help students and scholars alike to judge and understand the most modern attempts to resolve these problems *Some Main Problems of Philosophy* G. E. Moore, 1953 The Problems of Philosophy Bertrand Russell, 2009-07 In the following pages I have confined myself in the main to those problems of philosophy in regard to which I thought it possible to say something positive and constructive since merely negative criticism seemed out of place For this reason theory of knowledge occupies a larger space than metaphysics in the present volume and some topics much discussed by philosophers are treated very briefly if at all I have derived valuable assistance from unpublished writings of G E Moore and J M Keynes from the former as regards the relations of sense data to physical objects and from the latter as regards probability and induction I have also profited greatly by the criticisms and suggestions of Professor Gilbert Murray *The Metaphysics of G. E. Moore* David O'Connor, 2012-12-06 In this book setting aside his consideration of specifically ethical topics I try to provide a comprehensive interpretation of Moore s thought Against the background of this general interpretation I examine in detail his work on some of the central problems of metaphysics and because Moore s being able to sustain a consistent anti skepticism is essential to the survival of the base from which he works on those problems of epistemology too The interpretation of which I speak involves my taking as the centerpiece of Moore s philosophical work his book *Some Main Problems of Philosophy* written in 1910 as the text of a lecture series but left unpublished for over forty years thereafter That book is aptly titled for the issues with which Moore deals in it are indeed among the main problems of philosophy Not least of these are the problems of formulating a general categorial deSCription of the world and then of defending that formulation However while I will discuss Moore s work in light of its contribution to this project of taking metaphysical inventory it is important to note that he in common with many other major figures in contemporary analytical philosophy did not approach specific philosophical puzzles with a view to possibly integrating solutions to them into a comprehensive theory about reality as a whole that is into what might be called a metaphysical system **The Problems of Philosophy** Bertrand Russell, III, 2014-06-30 *The Problems of Philosophy* By Bertrand Russell *The Theory of Knowledge Complete New Edition* *The Problems of Philosophy* 1912 is one of Bertrand Russell s attempts to create a brief and accessible guide to the problems of philosophy Focusing on problems he believes will provoke positive and constructive discussion Russell concentrates on knowledge rather than metaphysics If it is uncertain that external objects exist how can we then have knowledge of them but by probability There is no reason to doubt the existence of external objects simply because of sense data Russell guides the

reader through his famous 1910 distinction between knowledge by acquaintance and knowledge by description and introduces important theories of Plato Aristotle Rene Descartes David Hume John Locke Immanuel Kant G W F Hegel and others to lay the foundation for philosophical inquiry by general readers and scholars alike In the following pages I have confined myself in the main to those problems of philosophy in regard to which I thought it possible to say something positive and constructive since merely negative criticism seemed out of place For this reason theory of knowledge occupies a larger space than metaphysics in the present volume and some topics much discussed by philosophers are treated very briefly if at all I have derived valuable assistance from unpublished writings of G E Moore and J M Keynes from the former as regards the relations of sense data to physical objects and from the latter as regards probability and induction I have also profited greatly by the criticisms and suggestions of Professor Gilbert Murray

Some Problems of Philosophy William James, 1979 Step by step the reader is introduced through analysis of the fundamental problems of Being the relation of thoughts to things novelty causation and the Infinite to the original philosophical synthesis that James called radical empiricism This is the seventh volume to be published in The Works of William James

Is there any knowledge in the world which is so certain that no reasonable man could doubt it This question which at first sight might not seem difficult is really one of the most difficult that can be asked When we have realized the obstacles in the way of a straightforward and confident answer we shall be well launched on the study of philosophy for philosophy is merely the attempt to answer such ultimate questions not carelessly and dogmatically as we do in ordinary life and even in the sciences but critically after exploring all that makes such questions puzzling and after realizing all the vagueness and confusion that underlie our ordinary ideas In daily life we assume as certain many things which on a closer scrutiny are found to be so full of apparent contradictions that only a great amount of thought enables us to know what it is that we really may believe In the search for certainty it is natural to begin with our present experiences and in some sense no doubt knowledge is to be derived from them But any statement as to what it is that our immediate experiences make us know is very likely to be wrong It seems to me that I am now sitting in a chair at a table of a certain shape on which I see

sheets of paper with writing or print By turning my head I see out of the window buildings and clouds and the sun I believe that the sun is about ninety three million miles from the earth that it is a hot globe many times bigger than the earth that owing to the earth's rotation it rises every morning and will continue to do so for an indefinite time in the future I believe that if any other normal person comes into my room he will see the same chairs and tables and books and papers as I see and that the table which I see is the same as the table which I feel pressing against my arm All this seems to be so evident as to be hardly worth stating except in answer to a man who doubts whether I know anything Yet all this may be reasonably doubted and all of it requires much careful discussion before we can be sure that we have stated it in a form that is wholly true To make our difficulties plain let us concentrate attention on the table To the eye it is oblong brown and shiny to the touch it is smooth and cool and hard when I tap it it gives out a wooden sound Any one else who sees and feels and hears the table will agree with this description so that it might seem as if no difficulty would arise but as soon as we try to be more precise our troubles begin Although I believe that the table is really of the same colour all over the parts that reflect the light look much brighter than the other parts and some parts look white because of reflected light I know that if I move the parts that reflect the light will be different so that the apparent distribution of colours on the table will change It follows that if several people are looking at the table at the same moment not two of them will see exactly the same distribution of colours because no two can see it from exactly the same point of view and any change in the point of view makes some change in the way the light is reflected For most practical purposes these differences are unimportant but to the painter they are all important the painter has to unlearn the habit of thinking that things seem to have the colour which common sense says they really have and to learn the habit of seeing things as they appear Here we have already the beginning of one of the distinctions that cause most trouble in philosophy the distinction between appearance and reality between what things seem to be and what they are

The Problems of Philosophy Illustrated Bertrand

Russell, 2021-05-02 *The Problems of Philosophy* is a 1912 book by the philosopher Bertrand Russell in which the author attempts to create a brief and accessible guide to the problems of philosophy He introduces philosophy as a repeating series of failed attempts to answer the same questions Can we prove that there is an external world Can we prove cause and effect Can we validate any of our generalizations Can we objectively justify morality He asserts that philosophy cannot answer any of these questions and that any value of philosophy must lie elsewhere than in offering proofs to these questions Focusing on problems he believes will provoke positive and constructive discussion Russell concentrates on knowledge rather than metaphysics If it is uncertain that external objects exist how can we then have knowledge of them but by probability There is no reason to doubt the existence of external objects simply because of sense data Russell guides the reader through his famous 1910 distinction between knowledge by acquaintance and knowledge by description and introduces important theories of Plato Aristotle René Descartes David Hume John Locke Immanuel Kant Georg Wilhelm Friedrich Hegel and others

to lay the foundation for philosophical inquiry by general readers and scholars alike In the following pages I have confined myself in the main to those problems of philosophy in regard to which I thought it possible to say something positive and constructive since merely negative criticism seemed out of place For this reason theory of knowledge occupies a larger space than metaphysics in the present volume and some topics much discussed by philosophers are treated very briefly if at all

Skepticism, Justification, and Explanation E. Cornman, 2012-12-06 This book is a manuscript that was virtually complete when James W Cornman died Most of the chapters were in final form and all but the last had been revised by the author The last chapter was in handwritten form and the concluding remarks were not finished Swain took charge of the proofreading and John L Thomas compiled the indices with the assistance of Lehrer It is our opinion that this manuscript like the other books Cornman published is one of exceptional scholarly and philosophical importance As do all of his philosophical publications this work reflects Cornman's great love for philosophy and his commitment to the search for truth Every serious student and author of epistemology will benefit from and admire the thorough scholarship and rigorous argumentation they will find herein It has been our privilege to participate in the preparation of the manuscript for the philosophical public

KEITH LEHRER MARSHALL SWAIN IX INTRODUCTION INTRODUCTION TO EPISTEMOLOGICAL SKEPTICISM Many philosophers try to refute skepticism but few try to give a precise characterization of the thesis they attack My first aim consequently is to characterize skepticism or more precisely several species of skepticism Then I shall choose those species I wish to consider and justify my choice To begin let me distinguish what I shall call epistemological skepticism from the thesis I shall call ontological nihilism and from what is believed by someone whom I shall call an ontological skeptic

Problems from Philosophy James Rachels, Stuart Rachels, 2008-03-21 This text is an introduction to some of the main problems of philosophy the existence of God the nature of the mind human freedom the limits of knowledge and the truth about ethics The chapters may be read independently of one another but when read in order they tell a more or less continuous story We begin with some reflections on the life of Socrates and then go on to the existence of God which is the most basic philosophical question because our answer to it affects everything else This leads naturally to a discussion of death and the soul and then to more modern ideas about the nature of persons The later chapters are about whether we can have objective knowledge in either science or ethics from the Preface **Problems from Philosophy** represents the final work of author and philosopher James Rachels In it he brings the same liveliness and clarity to the introduction of philosophy that he brings to his best selling ethics text *The Elements of Moral Philosophy* This second edition has been revised by Rachels son Stuart who carefully has carefully refined his father's work to further strengthen its clarity and accessibility
